S stock prices have increased much faster than gross domestic product GDP in the postwar period Between 1962 and 2000
corporate equity value relative to GDP nearly doubled In this paper we determine what standard growth theory says the
equity value should be in 1962 and 2000 the two years for which our steady state assumption is a reasonable one We find
that the actual valuations were close to the theoretical predictions in both years The reason for the large run up in equity
value relative to GDP is that the average tax rate on dividends fell dramatically between 1962 and 2000 We also find that
given legal constraints that effectively prohibited the holding of stocks as reserves for pension plans there is no equity
premium puzzle in the postwar period The average returns on debt and equity are as theory predicts *Kiplinger's Personal
