Using Emerging Technologies to Enhance Student Engagement Reynol Junco, Dianne M. Timm, 2008 Today's college students have never known a time when personal computers did not exist They attended K 12 schools where most of their classrooms were equipped with computers Information technology has always been part of their learning process not to mention the impact it has had on the development of their friendships research and writing skills shopping and choice of college or university to attend They expect that institutions of higher education will respond to their inquiries without delay much in the same way that customer service is handled on the Web Student expectations are driving the creation of live Web chats in house social networking sites university wiki and shared virtual spaces Unfortunately higher education faculty and staff in general and student affairs professionals in particular are behind the curve in their use of information technology Student affairs professionals are only starting to become aware that they should learn about the technologies that students have already integrated into their lives It is imperative that student affairs professions understand these technologies and learn how to implement them to enhance student learning build a sense of community increase student engagement facilitate communication This volume examines recent research on how information technology is affecting college student development and explores ways in which institutions are responding to increased demands for using emerging technology in supporting students This is the 124th volume of the Jossey Bass quarterly report series New Directions for Student Services an indispensable resource for vice presidents of student affairs deans of students student counselors and other student services professionals Each issue of New Directions for Student Services offers guidelines and programs for aiding students in their total development emotional social physical and intellectual Media, Public Communication and Globalization

Ruxandra Boicu, 2013 **Actor Models and Digital Natives** Tobias Fritsch, 2010-12-30 Master's Thesis from the year 2010 in the subject Sociology Media Art Music grade 1.0 University of Hagen language English abstract This thesis evaluates the role of actor models with regard to the changes in virtual environments The most commonly used actor models the homo economicus and the homo sociologicus as well as the emotional man and several less popular models are compared with regard to their level of explanation for behavior in virtual environment In this context online communities i.e. gaming

communities are observed The research framework and the structural conception of the measurement also are explained in detail A significant share of the input is based onto qualitative interviews with eight different digital natives who share a common computer gaming affinity The analysis includes qualitative interviews with these e athletes concerning their behavior within online communities These interviews contain interesting findings about their motivation especially the difference between virtual and real world social relationships The analysis shows interesting results since the players differentiate in between their role as an e athlete versus their role as a person This leads to a multi causal influence for their behavior which cannot solely be explained with a single influence factor Neither the homo economicus nor the homo sociologicus thus can explain their behavior on its own Therefore this thesis discusses methods to improve the current models in order to adopt behavioral changes through virtual environments A trade off between the most commonly models is given Afterwards the results of the analysis are compared to the statements of the interview partners These interviews indicate a strong personal influence from the environment on the role of a private person Additionally the behavior as an e athlete is also influenced by logical decisions which can be modeled through the homo economicus
