Memes in Frame-Semantic Perspective Niels Brause, 2017-03-07 Bachelor Thesis from the year 2016 in the subject English Language and Literature Studies Linguistics grade 1.3 University of Duisburg Essen Department of Anglophone Studies language English abstract One cannot escape them because they are everywhere There is scarcely a day without one coming across them They are a humorous picture a witty message or a funny video you find on the internet They are in our newsfeed on our message boards or in personal messages from our friends These sources of entertainment seem to be by now an important element of today's web society and there is a huge number of image boards like 9gag.com or reddit.com which have no other purpose than satisfying our needs for these sources of entertainment Even a growing number of newspapers have started to include this type of content in their online platforms A term that is often used to describe this accumulation of different visual entities is the term memes but this term is vague and ambiguous and it does not specifically say what kind of phenomena are included in it This bachelor thesis is an attempt to establish these phenomena labelled as memes as valuable objects for linguistic studies It will glance at several linguistic theories and check their relevance for analysing image macros as representatives for memes in general Finally it will analyse image macros by using the frame semantic framework thus integrating the former accomplished insights in one theoretic framework with only a few central terms This will support the thesis that frame semantics is capable of describing the patterns of encyclopaedic knowledge needed in order to understand complex bimodal entities

Stereotypes in Internet Memes. A Linguistic Analysis I. Magel, 2017-02-28 Examination Thesis from the year 2016 in the subject English Language and Literature Studies Linguistics grade 2.0 language English abstract At first glance internet memes seem to be the humorous part of our digital culture Indeed they are But they also reveal stereotypical thinking which I will focus on in my analysis This analysis will investigate thoroughly internet memes from a linguistic viewpoint Starting from Richard Dawkins' definition via Susan Blackmore's third replicator theory through to Limor Shifman's critical approach about the state of research concerning memes Internet memes are also examined from a communication oriented view Successful Black Man Successful White Man Ordinary Muslim Man and High Expectation Asian Father serve as a basis for my analysis A combination of Semiotic Analysis and Discourse Analysis is used in order to examine the selected examples Both methods were chosen because Internet memes involve written texts as well as signs or images which contain invisible meaning All results taken together this thesis will show that Internet memes are still interpreted stereotypically in our multicultural present day society

Urban Legends Nick Harding,2005 To many urban tales are nothing more than stories told with the express aim of provoking a frisson of fear in the listener But is there something working at a deeper level In this book Nick Harding sets out to describe a host of urban legends suggesting that we should not dismiss them purely as nonsense

The Climate Change Challenge and the Failure of Democracy David Shearman,Joseph Wayne Smith,2007-08-30 This provocative book presents compelling evidence that the fundamental problem behind environmental destruction and climate change in particular is the operation of liberal democracy Climate change threatens the future of civilization but humanity is impotent in effecting solutions Even in those nations with a commitment to reduce greenhouse emissions they continue to rise This failure mirrors those in many other spheres that deplete the fish of the sea erode fertile land destroy native forests pollute rivers and streams and utilize the world s natural resources beyond their replacement rate In this provocative book Shearman and Smith present evidence that the fundamental problem causing environmental destruction and climate change in particular is the operation of liberal democracy Its flaws and contradictions bestow upon government and its institutions laws and the markets and corporations that provide its sustenance an inability to make decisions that could provide a sustainable society Having argued that democracy has failed humanity the authors go even further and demonstrate that this failure can easily lead to authoritarianism without our even noticing Even more provocatively they assert that there is merit in preparing for this eventuality if we want to survive climate change They are not suggesting that existing authoritarian regimes are more successful in mitigating greenhouse emissions for to be successful economically they have adopted the market system with alacrity Nevertheless the authors conclude that an authoritarian form of government is necessary but this will be governance by experts and not by those who seek power There are in existence highly successful authoritarian structures for example in medicine and in corporate empires that are capable of implementing urgent decisions impossible under liberal democracy Society is verging on a philosophical choice between liberty or life But there is a third way between democracy and authoritarianism that the authors leave for the final chapter Having brought the reader to the realization that in order to halt or even slow the disastrous process of climate change we must choose between liberal democracy and a form of authoritarian government by experts the authors offer up a radical reform of democracy that would entail the painful choice of curtailing

our worldwide reliance on growth economies along with various legal and fiscal reforms Unpalatable as this choice may be they argue for the adoption of this fundamental reform of democracy over the journey to authoritarianism Mindsteps to the Cosmos Gerald S.
