Mindfulness, Mind-body Exercises, and Health Promotion Guodong Zhang, Yang Cao, Zi Yan, 2025-02-14 High intensity sports and physical exercise have been linked to various health benefits However when it comes to increasing longevity these activities may not be an ideal option for the general population Mind body exercise which combines physical exercise with mindfulness may be more effective in promoting and restoring health especially for those with chronic symptoms or poor health conditions Many mind body exercises such as Taichi Qigong Chan Chuang and Yoga have their roots in Eastern cultures They have gained popularity around the world and became a new fashion in the post COVID 19 era These exercises typically help practitioners shift their focus from the outside world past or future to the present moment through gentle body movements Mind body exercises emphasize the body s innate ability to heal itself By disconnecting from the noisy outside world the body is given the opportunity to heal This aligns with the classic belief in Chinese medicine that the body itself is the best medicine

Technology in Physical Activity and Health Promotion Zan Gao, 2017-05-08 As technology becomes an ever more prevalent part of everyday life and population based physical activity programmes seek new ways to increase lifelong engagement with physical activity so the two have become increasingly linked This book offers a thorough critical examination of emerging technologies in physical activity and health considering technological interventions within the dominant theoretical frameworks exploring the challenges of integrating technology into physical activity promotion and offering solutions for its implementation Technology in Physical Activity and Health Promotion occupies a broadly positive stance toward interactive technology initiatives and while discussing some negative implications of an increased use of technology offers practical recommendations for promoting physical activity through a range of media including social media mobile apps global positioning and geographic information systems wearables active videogames exergaming virtual reality settings Offering a logical and clear critique of technology in physical activity and health promotion this book will serve as an essential reference for upper level undergraduates postgraduate students and scholars working in public health physical activity and health and kinesiology and healthcare professionals
