*Pests of Field Crops and Pastures* Peter T. Bailey, 2007 Here for the first time is a comprehensive handbook on economic entomology for field crops and pastures It is organised by commodities such as cereals sugar and tropical pasture legumes allowing all the arthropods on a particular commodity to be examined     *Pulses, Sugar and Tuber Crops* Chittaranjan Kole, 2007-01-20 Pulses Sugar and Tuber Crops comprises reviews contributed by 47 eminent scientists from 10 countries The chapters on common bean pea cowpea sugarcane and potato include comprehensive reviews of voluminous research findings Fundamental aspects and molecular results are also presented for eight orphan crops of high agro-economic importance including mungbean lentil chickpea lathyrus pigeonpea sweet potato cassava and yam works on quinoa and Bambara groundnut are reviewed for the first time     **Intercropping Systems in Sustainable Agriculture** Paulo Mazzafera, José Laércio Favarin, Sara Adrián López de Andrade, 2021-03-30     *Photoassimilate Distribution Plants and Crops Source-Sink Relationships* Eli Zamski, Arthur A. Schaffer, 2017-09-29 Adopting an interdisciplinary approach to the study of photoassimilate partitioning and source sink relationships this work details the major aspects of source sink physiology and metabolism the integration of individual components and photoassimilate partitioning and the whole plant source sink relationships in 16 agriculturally important crops The work examines in detail the components of carbon partitioning such as ecology photosynthesis loading transport and anatomy and discusses the impact of genetic environmental and agrotechnical factors on the parts of whole plant source sink physiology     **Weed Control** Andrew Price, 2012-02-29 Crop loss due to weeds has challenged agricultural managers since man began to develop the first farming systems In the past century however much progress has been made to reduce weed interference in crop settings through effective yet mostly non-sustainable weed control strategies With the commercial introduction of herbicides during the mid 1900 s advancements in chemical weed control tactics have provided efficient suppression of a broad range of weed species for most agricultural practices Currently with the necessity to design effective sustainable weed management systems research has been pushing new frontiers on investigating integrated weed management options including chemical mechanical as well as cultural practices Author contributions to Weed Science present significant topics of research that examine a number of options that can be utilized to develop successful and sustainable weed management systems for many areas of crop production
