**A Cumulative Bibliography of Medieval Military History and Technology** Kelly DeVries, 2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ

from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense

**Pope Gregory IX (1227-1241)** Damian J. Smith, 2025-10-01 As Cardinal Hugo and as pope Gregory was one of the dominant figures in the history of the papacy of the High Middle Ages Coming to prominence under Pope Innocent III Hugo played an important political role particularly as legate on various occasions as well as being a major promoter of the new religious orders As pope his battle with Emperor Frederick II is one of medieval history's most absorbing conflicts But he also acted as peacemaker promoter of the Crusades instigator of mission for the sake of conversion reformer of the Curia patron of arts and liturgy and as a passionate advocate of Church reform His decretal collection the *Liber Extra* was the most influential of the Middle Ages A full examination of Gregory's pontificate is very long overdue The current volume brings together a team of international scholars each of them expert in dealing with a particular aspect of the pontificate and provides what will be a collection of studies of lasting scholarly value on a central figure of the medieval papacy The Glorious Art of Peace John Gittings, 2012-02-23 A ground breaking history of the arts of peace from Confucius and Ancient Greece through to the 21st century opening an alternative window on history to show the strength of the case for peace which has been argued from ancient times onwards **Deutsches Archiv für Erforschung des Mittelalters**, 2000 No War, No Peace Roger Mac Ginty, 2016-01-06 This book investigates stalled and dysfunctional peace processes and peace accords in societies experiencing civil wars Using a critical and comparative perspective it offers strategies for rejuvenating and re-orientating stalled peace processes and peace accords so that they are more able to foster sustainable and inclusive peace LiLi, Zeitschrift für Literaturwissenschaft und Linguistik, 1998 *Bibliographic Index*, 2009 *Peace and Negotiation* Arizona Center for Medieval and Renaissance Studies. Conference, 2000 Peace was far from a pale static concept a simple lack of violence in the Middle Ages and Renaissance Rather it was at times constructed as a rich and complex positive and dynamic ideal The thirteen articles in this volume cover a broad range of disciplines times and geographical areas and explore strategies that were used in the past to resolve conflict and attain peace They examine events texts and images that date from the fifth through the sixteenth centuries and their authors focus not only on Western Europe but also on Scandinavia the Caucasus and Egypt This volume rests on the assumption that peace covers a spectrum of situations that connects the personal and the political Therefore the papers presented here examine not only how nations negotiated peace but also how individuals did Similarly although several essays spotlight those in the seat of power others explore those who are politically marginalized our views about peace and conflict as this collection makes clear are shaped in part by the

mentalities of the past Although some peacemaking strategies may be unacceptable to us today forced marriages and conversions for example we can learn from other strategies how to transcend or modify various modes of antagonistic thinking Cumulative Book Index ,1998 A world list of books in the English language **A History of Christian, Jewish, Hindu, Buddhist, and Muslim Perspectives on War and Peace: The Bible to 1914** Jerry William Frost,2004 Frost Swarthmore College has written widely about peace and Quakers Here he compiles perspectives from the major world religions on war and peace for general readers who are not specialists in the history of religions the evolution of wars the relationship between the two but are interested in how faith communities in the past dealt with issues similar to those in effect now In addition he says particular chapters could be used in undergraduate courses and seminars Volume two focuses on what it calls a century of wars from World War I into the post Cold War era The two volumes are paged together and the index and bibliography for both are contained in each Amazon **A History of Christian, Jewish, Hindu, Buddhist, and Muslim Perspectives on War and Peace: A century of wars** Jerry William Frost,2004 Frost Swarthmore College has written widely about peace and Quakers Here he compiles perspectives from the major world religions on war and peace for general readers who are not specialists in the history of religions the evolution of wars the relationship between the two but are interested in how faith communities in the past dealt with issues similar to those in effect now In addition he says particular chapters could be used in undergraduate courses and seminars Volume two focuses on what it calls a century of wars from World War I into the post Cold War era The two volumes are paged together and the index and bibliography for both are contained in each Amazon **Bulletin** ,2002 *Yearbook of International Organizations 2014-2015 (Volume 4)* Union Of International Associations,Union of International Associations,2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations currently available Detailed profiles of international non governmental and intergovernmental organizations IGO collected and documented by the Union of International Associations can be found here In addition to the history aims and activities of international organizations with their events publications and contact details the volumes of the Yearbook include networks between associations biographies of key people involved and extensive statistical data Providing both an international organizations and research bibliography Volume 4 cites over 46 000 publications and information resources supplied by international organizations and provides nearly 18 000 research citations under 40 subject headings This volume also includes a research bibliography on international organizations and transnational associations Subject Guide to Books in Print ,1991 **Books in Print** ,1991 *American Book Publishing Record* ,2002 *Reference & User Services Quarterly* ,1997
