The Columbia History of Latinos in the United States Since 1960

David G. Gutiérrez, 2004-07-20 Latinos are now the largest so called minority group in the United States the result of a growth trend that began in the mid twentieth century and the influence of Latin cultures on American life is reflected in everything from politics to education to mass cultural forms such as music and television Yet very few volumes have attempted to analyze or provide a context for this dramatic historical development The Columbia History of Latinos in the United States Since 1960 is among the few comprehensive histories of Latinos in America This collaborative interdisciplinary volume provides not only cutting edge interpretations of recent Latino history including essays on the six major immigrant groups Mexicans Cubans Puerto Ricans Dominicans Central Americans and South Americans but also insight into the major areas of contention and debate that characterize Latino scholarship in the early twenty first century This much needed book offers a broad overview of this era of explosive demographic and cultural change by exploring the recent histories of all the major national and regional Latino subpopulations and reflecting on what these historical trends might mean for the future of both the United States and the other increasingly connected nations of the Western Hemisphere While at one point it may have been considered feasible to explore the histories of national populations in isolation from one another all of the contributors to this volume highlight the deep transnational ties and interconnections that bind different peoples across national and regional lines Thus each chapter on Latino national subpopulations explores the ambiguous and shifting boundaries that so loosely define them both in the United States and in their countries of origin A multinational perspective on important political and cultural themes such as Latino gender systems religion politics expressive and artistic cultures and interactions with the law helps shape a realistic interpretation of the Latino experience in the United States

Grassroots Expectations of Democracy and Economy Nancy R. Powers, 2001-02-15

This highly readable study addresses a range of fundamental questions about the interaction of politics and economics from a grassroots perspective in post transition Argentina Nancy R Powers looks at the lives and political views of Argentines of little to modest means to examine systematically how their political interests and their evaluations of democracy are formed Based on the author s fieldwork in Argentina the analysis extends to countries of Latin America and Eastern Europe facing similarly difficult political and economic changes Powers uses in depth interviews to examine how not simply what ordinary people think about their standard of living their government and the democratic regime She explains why they sometimes do but more often do not see their material conditions as political problems arguing that the type of hardship and the possibilities for coping with it are more politically significant than the degree of hardship She analyzes alternative ways in which people define democracy and judge its legitimacy Not only does Powers demonstrate contradictions and gaps in the existing scholarship on economic voting social movements and populism she also shows how those literatures are addressing

similar questions but are failing to talk to one another Powers goes on to build a more comprehensive theory of how people at the grassroots form their political interests To analyze why people perceive only some of their material hardships as political problems she brings into the study of politics ideas drawn from Amartya Sen and other scholars of poverty

Jamaica And The Sugar Worker Cooperatives Carl Henry Feuer,2019-03-13 Between 1974 and 1977 as part of a wider attempt by Prime Minister Michael Manley's regime to carry out a democratic reformist strategy of development the three largest sugar estates in Jamaica were converted into worker managed farms Within a few years however the cooperative program was in disarray as the farms faced economic setbacks and as political conflicts developed among the sugar workers local authorities and the government Drawing on his extensive field research in Jamaica Dr Feuer traces the development and decline of the cooperative system and discusses the implications for the possibility of democratic reform In his view the logic of the cooperativization process conflicted with the priorities of the middle class which continued to dominate the Jamaican economy As a result the reforms were never firmly rooted in a political coalition with the resources to carry them out In light of the Jamaican experience Dr Feuer considers such questions as What are the obstacles a nonrevolutionary regime is likely to face in an effort to help the poor How feasible is it to mobilize the requisite political and administrative resources and neutralize the inherent constraints to reform Peasant Studies ,1984 Passion, Craft, and Method in Comparative Politics Gerardo L. Munck,Richard Snyder,2007-05-30 In the first collection of interviews with the most prominent scholars in comparative politics since World War II Gerardo L Munck and Richard Snyder trace key developments in the field during the twentieth century Organized around a broad set of themes intellectual formation and training major works and ideas the craft and tools of research colleagues collaborators and students and the past and future of comparative politics these in depth interviews offer unique and candid reflections that bring the research process to life and shed light on the human dimension of scholarship Giving voice to scholars who practice their craft in different ways yet share a passion for knowledge about global politics Passion Craft and Method in Comparative Politics offers a wealth of insights into contemporary debates about the state of knowledge in comparative politics and the future of the field Margaret Keck Johns Hopkins University **Feminist Political Ecology** Dianne Rocheleau,Barbara Thomas-Slayter,Esther Wangari,2013-04-15 Feminist Political Ecology explores the gendered relations of ecologies economies and politics in communities as diverse as the rubber tappers in the rainforests of Brazil to activist groups fighting racism in New York City Women are often at the centre of these struggles struggles which concern local knowledge everyday practice rights to resources sustainable development environmental quality and social justice The book bridges the gap between the academic and rural orientation of political ecology and the largely activist and urban focus of environmental justice movements

Supporting Civil Society Laura Macdonald,2016-07-27 Many analysts are looking to non governmental organizations NGOs as the promoters of more equitable and democratic forms of development because of their status as actors in civil

society Based on a critical evaluation of six rural development projects in Costa Rica and Nicaragua Supporting Civil Society shows that NGOs often perpetuate paternalism and dependency It is argued that both international and national NGOs need to support social movements which are best able to express the demands of people at the grassroots Social Networks John Scott,2002 This collection brings together the principal sources in the development of the techniques of social network analysis from early metaphorical statements in Simmel and Radcliffe Brown through the more systematic explorations in sociology and social anthropology to contemporary formalizations A new introduction explores the history of Social Networks and highlights the arguments of those who treat social network analysis as a loose qualitative approach as well as those who see its potential in technical mathematical uses The thematically organized coverage includes Part I Conceptualizing Social Networks Part II Topics and Developments in Graph Theory Part III Further Mathematical Models for Networks Part IV Applications Family and Community Part V Applications Corporate Power and Economic Structures Part VI Applications Political Protest and Policy Networks Part VII Applications Knowledge Reputation and Diffusion *Third World Peasants and Agrarian Change in the Twentieth Century* ,1988 **Der Karibische Raum** Wolfgang Grenz,1980 Third World Peasantry Rameshwar Prasad Misra,1986 **Structures of Domination and Peasant Movements in Latin America** Peter Singelmann,1981 Although the results of Latin American peasant movements appeared particularly impressive in the 1960s and the 1970S the end of the decade witnessed the progressive repression of the major movements on the continent Latin American peasant movements thus have to be understood in terms of their conditions their accomplishments in terms of potential class emancipation and alternative outcomes such as repression reform and co optation Peasants Against the State Nathan J.
