**When Men Revolt and Why** Harold J. Bershady, 2020-03-26 The environment within which humans interact has changed dramatically since the Industrial Revolution However their expectations stem from the same hopes and dreams people have had from the beginning of humankind When Men Revolt and Why encourages readers to look closer and more deeply into the relationships between humans and the institutions that have originated to help them realize their full potential The contributors not only examine people but also the need to change institutions that have outworn their usefulness When institutions inhibit rather than facilitate everyone's desire to live a full life the result is likely to be violence This book offers the ideas of many people who have tried to dig deeper into basic causes of violence Included in this volume are selections by Aristotle Tocqueville Marx and Engels and Brinton The ideas they espoused still hold vitality In his new introduction James Davies talks about the circumstances under which this book was originally published In Vietnam a people were fighting for their autonomy In the United States many Americans were protesting against American involvement in the Vietnam War Blacks were marching for their civil rights Women were fighting for equality Time has tempered these conflicts Davies maintains that we remain ignorant of the elemental forces that impel people and nations to resort to violence We are usually surprised by their anger and shocked by their violence Davies asserts that we need to learn more about how humans respond to change so as to prepare ourselves for such responses to change When Men Revolt and Why is as timely as ever as we deal with uncertainty in various areas of the world the former Yugoslavia the Middle East and Ireland among others It is especially pertinent for political scientists historians and sociologists **The Peasant War in Germany**, 1969

*Americans Knocking at Freedom's Door* Bernie Lee (Yoder) Smith-DeBoe, 2016-08-05 Americans pursue life and liberty through their religious freedom economic well being and self governance that includes a basic understanding of the constitutional principles provided by our founding fathers Hopefully our pursuit of life and liberty also includes a curiosity to explore our rich and diverse history Americans Knocking at Freedom's Door is a uniquely American heritage of religious freedoms and government of and by the people The author Bernie Lee Yoder Smith DeBoe presents a conversational discussion and a historical exploration of our Christian roots This book begins with Noah's ark and continues with the ancient tribes the Middle Ages religious wars American DNA and why the early settlers came to America Our knowledge of American history generally includes our founding fathers the Civil War and more contemporary wars however this tells us very little about our early settlers their challenges and their background as people of religious faith This book offers some historical background and stories about those who established and helped the United States to grow and flourish It reminds us that we are Americans We stand together as Americans and we need to come together as Americans **The Classical Marxist Critiques of Religion: Marx, Engels, Lenin, Kautsky** D.B. McKown, 2012-12-06 In view of the enormous number of works on Marxism in general and in light of the many books and articles touching on the relationship of Marxism to religion in

particular it may fairly be asked why yet another such work should be produced My reply is that in eliciting answers to the kinds of questions posed by the methodology I have used it was necessary to go to the primary sources almost exclusively This is not to bemoan a sad fate but to affirm that there are notable deficiencies in the secondary sources relevant to my topic By way of general indictment I contend that the major difficulty with existing studies of the Marxist critique of religion is that their authors whether expositors or critics have failed both to specify their own presuppositions concerning religion and to approach the subject with an adequate comprehension of its many dimensions Since in most cases the reader is equally unprepared anthropologically sociologically psychologically and historically for clear and informed thought in this vast and nebulous area the result has been widespread confusion As if this were not enough numerous writers with little more than polemical interests have compounded the confusion by failing to distinguish between religion in general and their own brands of faith in particular Others have not discriminated between the concepts of metaphysics and the supernatural items of religious belief
