Peasants Merchants Markets:

Peasants, Merchants, and Markets James Masschaele, 1997 *Peasants Merchants and Markets* deals with the development of regional networks of trade and social interaction in the two centuries before the Black Death a period which saw dynamic changes in relations between towns and their rural hinterlands By examining the economic interests of urban merchants and peasant traders the commodities they exchanged and the markets and transportation networks they used to engage in trade the book explores how commerce helped to erode the localism of medieval society and to create enduring institutions and motivations for a more expansive social and economic life The book offers original interpretations and original use of historical source material and will be of interest to scholars and students of medieval and English history as well as historians dealing with commercial development in other periods and places Merchants, Market and Monarchy Tengda Hua, 2021-08-09 This book explores the vital role of merchants within early modern China Unlike European merchants their Sino colleagues have long been regarded as certain social pariahs after pre Qin period despite the fortune they made The key mission of this monograph is to investigate whether the standing of merchants in the Ming Empire has been improved compared with their predecessors Generally their status is reflected in state merchant relationship and their role in the market which can be found in miscellaneous economic activities such as market monopoly commercial taxation international trade and consumption This book aims to be of relevance to students and researchers interested in early modern history eastern commerce Ming merchants and contemporary global affairs Manufactures and Trade Russia. Departament trgovli i manufaktur, 1893 The Hong Merchants of Canton Weng Eang Cheong, 2013-10-11 This study eschews the uncritical acceptance of secondary sources that has characterized studies in this field going back to and reinterpreting previously neglected primary sources thereby enabling it to chart linkages between the European and Asian trades that have been regarded as parallel but unrelated or at best competing activities In so doing the work sheds new light on this crucial period *The Complete Works of Lyof N. Tolstoï* graf Leo Tolstoy, 1899 **The Complete Works of Lyof N. Tolstoï** graf Leo Tolstoy, 1899 Board of Trade Journal, 1895 Merchants and Entrepreneurs in Imperial Russia Alfred J. Rieber, 1982 This book is the first general history of Russian businessmen from Peter the Great to the Revolution of 1917 It is also a challenging new interpretation of the nature of social change in tsarist Russia Alfred Rieber seeks to explain how Russia developed a capitalist economy and launched a major industrialization without giving rise to a mature bourgeoisie His analysis concentrates on the deep seated social divisions that prevented the political unity of the Russian middle classes even when their vital interests were threatened by powerful bureaucrats and a workers revolution He concludes that the fate of the Russian merchants and industrialists was part of a larger social fragmentation in Russia on the eve of World War I Rieber argues that the merchantry was throughout its history the most unstable and politically passive group in Russian society Periodically swamped by an influx of peasants the merchants were never able to free themselves from state tutelage or their

own traditional values Surrounded by ethnic rivals the Great Russian merchantry adopted the mentality of a besieged camp The real innovators in Russia s industrialization were social deviants Old Believer peasants declasse nobles and non Russian peoples on the periphery of the empire But even these entrepreneurial groups failed to provide the leadership for a strong middle class because they were deeply marked by competing regional and ethnic attachments In Rieber s analysis the Russian bureaucracy shares much of the blame for the absence of a cohesive class structure in Russia It feared and opposed the emergence of a bourgeoisie and it was deeply split over the question of industrialization Rieber concludes that the bureaucracy helped to maintain the legal distinctions within Russian society that contributed to its fragmentation This work touches on almost every aspect of imperial Russian society its political and legal institutions social movements intellectual currents and economic development Rieber has drawn on a wide range of sources including Soviet archives merchant memoirs contemporary journals pamphlets and newspapers and the proceedings and reports of many specialized societies and organizations Originally published in 1991 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value
