Nico,2024-09-23 The motivation to dedicate a volume of the Conservation 360 series to education and pedagogy arose during
the COVID years 2020 and 2021 when conservation restoration teachers were forced to suddenly change the format of their
lessons In Europe an informal and international group called AcCESS Academic Conservation Education Sharing Site was
formed to share and support each other on how to teach online It was soon realized that the challenges associated with the
curriculum were larger and deeper than the shift from face to face to online format It was also realized that the literature
available both at the level of curriculum structure and at the level of classroom didactics was sparse and that teachers mostly
relied on their experience as students personal contacts with other teachers or general didactic publications not related to
the field of conservation restoration The present volume aims to fill this gap by collecting reflections and experiences on the
evolution of the curriculum and its role in defining the profession and by tracing important changes in the education of
conservators restorers both in terms of the decolonization of the discipline and the role of curricula in addressing societal
and environmental challenges such as climate change **Anales de higiene escolar** Mexico Servicio higiénico
