Pedagogy Printing And Protestantism The Discourse On Childhood:

Pedagogy, Printing and Protestantism Carmen Luke, 1989-07-01 Using Foucault's history of discourse this book examines the relationship between the invention of the printing press and the evolution of concepts regarding childhood and schooling. It is an interdisciplinary study of schooling, childhood, literacy and protestantism in 16th century Germany. Luke traces the agenda for the rearing and education of the young as outlined by the Protestant reformers and popularized by the advent of printing. Luther's print-based religious campaign led to his call for universal public schooling to promote literacy, a fundamental requirement of the new theology. Luke identifies the development of an emergent discourse on childhood in the reformer's tracts, school ordinances, personal correspondences, conduct and household and medical guides. From a Foucauldian archeological perspective, then, *Pedagogy, Printing and Protestantism* examines the conditions that enabled the emergence of early modern discourse on childhood.

Deconstructing Early Childhood Education Gaile Sloan Cannella, 1997 From a critical perspective, some early childhood educators have proposed that the knowledge base used to ground the field actually serves to support the status quo, reinforces prejudices and stereotypes and ignores the real lives of children. The purpose of this book is to deconstruct early childhood education, identifying and evaluating the themes and forms of discourse that have dominated the field, leading to the construction of specific theories and forms of practice that privilege particular groups of children and adults and oppress others. An alternative avenue for early childhood education is posited that focuses on social justice and human agency.
