Pedro And The Bananas:

Reinterpreting the Banana Republic Darío A. Euraque, 2000-11-09 In this new analysis of Honduran social and political development Darío Euraque explains why Honduras escaped the pattern of revolution and civil wars suffered by its neighbors Guatemala El Salvador and Nicaragua Within this comparative framework he challenges the traditional Banana Republic theory and its assumption that multinational corporations completely controlled state formation in Central America Instead he demonstrates how local society in Honduras's North Coast banana exporting region influenced national political development According to Euraque the reformism of the 1970s which prevented social and political polarization in the 1980s originated in the local politics of San Pedro Sula and other cities along the North Coast Moreover Euraque shows that by the 1960s the banana growing areas had become bastions of liberalism led by local capitalists and organized workers This regional political culture directly influenced events at the national level argues Euraque Specifically the military coup of 1972 drew its ideology and civilian leaders from the North Coast and as a result the new regime was able to successfully channel popular unrest into state sponsored reform projects Based on long ignored sources in Honduran and American archives and on interviews the book signals a major reinterpretation of modern Honduran history The Columbia Gazetteer of the World: A to G Saul Bernard Cohen, 2008 A geographical encyclopedia of world place names contains alphabetized entries with detailed statistics on location name pronunciation topography history and economic and cultural points of interest
