The New World of UN Peace Operations Thorsten Benner, Stephan Mergenthaler, Philipp Rotmann, 2011-06-09 Peace operations are the UN s flagship activity Over the past decade UN blue helmets have been dispatched to ever more challenging environments from the Congo to Timor to perform an expanding set of tasks From protecting civilians in the midst of violent conflict to rebuilding state institutions after war a new range of tasks has transformed the business of the blue helmets into an inherently knowledge based venture But all too often the UN blue helmets policemen and other civilian officials have been flying blind in their

efforts to stabilize countries ravaged by war The UN realized the need to put knowledge guidance and doctrine and reflection on failures and successes at the center of the institution Building on an innovative multi disciplinary framework this study provides a first comprehensive account of learning in peacekeeping Covering the crucial past decade of expansion in peace operations it zooms into a dozen cases of attempted learning across four crucial domains police assistance judicial reform reintegration of former combatants and mission integration Throughout the different cases the study analyzes the role of key variables as enablers and stumbling blocks for learning bureaucratic politics the learning infrastructure leadership as well as power and interests of member states Building on five years of research and access to key documents and decision makers the book presents a vivid portrait of an international bureaucracy struggling to turn itself into a learning organization Aimed at policy makers diplomats and a wide academic audience including those working in international relations peace research political science public administration and organizational sociology the book is an indispensable resource for anyone interested in the evolution of modern peace operations

ist Das besondere Engagement der NATO die von 2003 bis 2014 die Führung über die militärische Missionskomponente ISAF innehatte wird dabei kritisch gewürdigt So entsteht ein Gesamtbild der Vor und Nachteile des arbeitsteiligen Peace Keeping zwischen den Vereinten Nationen ihren Mitgliedstaaten und regionalen Partnern wie der NATO im kriegsgeplagten Land am Hindukusch **Peace Operations Seen from Below** Béatrice Pouligny, 2006 In Peace Operations Seen from Below

Beatrice Pouligny argues that much of what is being rebuilt in societies emerging from war or in some cases what is continuing to be destroyed often lies in the ordinary daily lives of both local populations and the staff of UN missions These on the ground realities are often overlooked by outsiders yet they may prove to be as important as political negotiations at the center debates in the UN Security Council or hearings before an International Criminal Court Central to Pouligny's study is the key role played by local interlocutors Her close analysis of several UN interventions based on first hand observation of how local people intermingle with UN soldiery and civilians sheds light on a neglected but crucial dimension of international peace enforcement **BOOK JACKET** *Peace Operations* Donald C. F. Daniel, Patricia Taft, Sharon Wiharta, 2008-07-30 Trends in the number and scope of peace operations since 2000 evidence heightened international appreciation for their value in crisis response and regional stabilization Peace Operations Trends Progress and Prospects addresses national and institutional capacities to undertake such operations by going beyond what is available in previously published literature Part one focuses on developments across regions and countries It builds on data gathering projects undertaken at Georgetown University's Center for Peace and Security Studies CPASS the Stockholm International Peace Research Institute SIPRI and the Folke Bernadotte Academy FBA that offer new information about national contributions to operations and about the organizations through which they make those contributions The information provides the bases for arriving at unique insights about the characteristics of contributors and about the division of labor between the United Nations and other international entities Part two looks to trends and prospects within regions and nations Unlike other studies that focus only on regions with well established track records specifically Europe and Africa this book also looks to the other major areas of the world and poses two questions concerning them If little or nothing has been done institutionally in a region why not What should be expected This groundbreaking volume will help policymakers and academics understand better the regional and national factors shaping the prospects for peace operations into the next decade **Peace Operations and Global Order** Alex J.
