**Peacemaking among Primates** Frans B. M. de Waal, F. B. M. de Waal, 1990-09-01 Does biology condemn the human species to violence and war Previous studies of animal behavior incline us to answer yes but the message of this book is considerably more optimistic Frans de Waal describes the makeup of our closest animal relatives and in so doing shows that to humans making peace is as natural as making war Peacemaking among Primates Frans B. M. DE WAAL, F. B. M. de Waal, 2009-06-30 Does biology condemn the human species to violence and war Previous studies of animal behavior incline us to answer yes but the message of this book is considerably more optimistic Without denying our heritage of aggressive behavior Frans de Waal describes powerful checks and balances in the makeup of our closest animal relatives and in so doing he shows that to humans making peace is as natural as making war In this meticulously researched and absorbing account we learn in detail how different types of simians cope with aggression and how they make peace after fights Chimpanzees for instance reconcile with a hug and a kiss whereas rhesus monkeys groom the fur of former adversaries By objectively examining the dynamics of primate social interactions de Waal makes a convincing case that confrontation should not be viewed as a barrier to sociality but rather as an unavoidable element upon which social relationships can be built and strengthened through reconciliation The author examines five different species chimpanzees rhesus monkeys stump tailed monkeys bonobos and humans and relates anecdotes culled from exhaustive observations that convey the intricacies and refinements of simian behavior Each species utilizes its own unique peacemaking strategies The bonobo for example is little known to science and even less to the general public but this rare ape maintains peace by means of sexual behavior divorced from reproductive functions sex occurs in all possible combinations and positions whenever social tensions need to be resolved Make love not war could be the bonobo slogan De Waal's demonstration of reconciliation in both monkeys and apes strongly supports his thesis that forgiveness and peacemaking are widespread among nonhuman primates an aspect of primate societies that should stimulate much needed work on human conflict resolution **Peacemaking Among Primates** Frans de Waal, Frans B. M. Waal, 1991 **Peacemaking** Susan Allen Nan, Zachariah Cherian Mampilly, Andrea Bartoli, 2011-11-10 In a world where conflict is never ending this thoughtful compilation fosters a new appreciation of the art of peacemaking as it is understood and practiced in a variety of contemporary settings Peacemaking From Practice to Theory is about seeing knowing and learning peacemaking as it exists in the real world Built on the premise that peacemaking is among the most elemental of human experiences this seminal work emphasizes the importance of practice and lived experiences in understanding the process and learning what works to nurture peace To appropriately reflect the diversity of peacemaking practices challenges and innovations these two volumes bring together many authors and viewpoints The first volume consists of two sections Peacemaking in Practice and Towards an Inclusive Peacemaking the second of two additional sections New Directions in Peacemaking and Interpreting Peacemaking As the title states the work moves peacemaking

beyond mere theory showcasing peacemaking efforts produced recorded recognized and understood by a variety of individuals and institutions In doing so it refocuses the study of peacemaking and guides readers to a systematic understanding and appreciation of the practices of peacemakers around the globe What Causes War? Greg Cashman,2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations **Peacemaking Among Primates** Frans B.M. De Waal,1994 Peace Antony Adolf,2013-05-08 How peace has been made and maintained experienced and imagined is not only a matter of historical interest but also of pressing concern Peace A World History is the first study to explore the full spectrum of peace and peacemaking from prehistoric to contemporary times in a single volume aimed at improving their prospects By focusing on key periods events people ideas and texts Antony Adolf shows how the inspiring possibilities and pragmatic limits of peace and peacemaking were shaped by their cultural contexts and in turn shaped local and global histories Diplomatic pacifist legal transformative non violent and anti war movements are just a few prominent examples Proposed and performed in socio economic political religious philosophical and other ways Adolf's presentation of the diversity of peace and peacemaking challenges the notions that peace is solely the absence of war that this negation is the only task of peacemakers and that history is exclusively written by military victors Without the victories of peacemakers and the resourcefulness of the peaceful he contends there would be no history to write This book is essential reading for students scholars policy shapers activists and general readers involved with how present forms of peace and peacemaking have been influenced by those of the past and how future forms can benefit by taking these into account

Aquinas, Science, and Human Uniqueness Mary L. Vanden Berg,2022-12-15 What is a human being What makes humans special different from other creatures Or is a human just another animal Drawing on Scripture Aquinas and science this book

seeks to articulate both why and how humans should be understood as special. Despite amazing similarities to other creatures, humans are physiologically, psychologically and spiritually unique beings. No other creatures, not even angels, have the unique combination of capacities nor the divine calling that humans have. Vanden Berg argues that only humans are material, spiritual, intellectual, worshipping beings created specifically for a personal relationship with their Creator and with the stated vocation of caring for God's world and representing God in it.

**Evolution of Social Behaviour Patterns in Primates and Man** Walter Garrison Runciman, John Maynard Smith, Robin Ian MacDonald Dunbar, 1996. The fourteen contributions testify to the increasing co-operation which is bringing together biologists, primatologists, archaeologists, psychologists, linguists and anthropologists who share a common interest in the study of social and cultural behaviour from an evolutionary perspective. The papers derived from a Royal Society/ British Academy meeting range in topic from cultural and social behaviour among non-human primates through the interaction of cognitive development with social organization during the Upper Palaeolithic to behaviour including linguistic behaviour among modern humans. This volume reflects the important recent developments in such areas as behavioural ecology, evolutionary psychology and the origin and function of language.

**Kompromisses** Martin Greiffenhagen, 1999-01-31. Das Buch beschreibt einen Paradigmenwechsel des Kompromi: themas Aus- blo- en Strategien wird eine Lebensform. Gründe für diesen Wandel entwickelt der Autor sowohl in weltgeschichtlicher wie zeitgeschichtlicher Sicht. Vor dem historischen Hintergrund deutschen Schwarz- Wei- Denkens bis 1945 werden Grundstrukturen des Kompromi- handelns entwickelt. Die Quellen dafür reichen teilweise hinter das erste Auftreten des homo sapiens zurück als elementare Erfahrungen von Reziprozität und Kooperation, sozialem Vertrauen und einem in gemeinsamer Herkunft und Zukunft gründenden Zeitbewusstsein. Das Buch stellt unterschiedliche Kompromi- kulturen der Menschheitsgeschichte vor unter jeweils neuen Bedingungen, Chancen und Einschränkungen. Für die Gegenwart nimmt Greiffenhagen einen Paradigmenwechsel des Kompromi- themas an. Aus einem Arsenal von Klugheitsregeln allseitigen Nachgebens entwickelt sich ein Stil kooperativen Verhaltens. An Beispielen neuer Kompromi- formen beschreibt der Autor diesen Wandel.      *Der Mythos vom Zivilisationsprozess: Obszönität und Gewalt* Hans Peter Duerr, 1988      **The Animals'**
