## Peak Learning:

**Inquiry, Data, and Understanding** Lorin W. Anderson, 2023-05-31 Inquiry Data and Understanding is a reflective collection of papers in which Lorin Anderson offers his personal perspective on developments in educational research over thirty years. Following an introductory chapter in which educational research is defined as disciplined inquiry, the remaining chapters are divided into four sections: time and learning factors influencing educational effectiveness; international perspectives; and the nature and purpose of educational research. Each section contains an introduction that places the chapters in that section in a historical and personal context. The fourth section, which concludes the book, summarises four lessons that were learned about becoming a researcher. Based on these lessons, the final chapter describes four needs that must be met if school and classroom research is to move forward: The need for concept-based research; The need to put students back into the equation; The need to stop focusing on correlates of student achievement; The need for research on alterable variables.

*Advancing Business Ethics Education* Diane L. Swanson, Dann G. Fisher, 2008-04-01 This book features sixteen chapters written by distinguished scholars who collectively point to a roadmap for advancing business ethics education at a critical juncture in the history of corporate America. The editors frame the book with an introductory chapter that details a gold standard for delivering ethics in the business school curriculum that signals to students that ethics matters, provides an adequate counterbalance to the amoral subtext that dominates much of business education, remedies assessment problems associated with current accrediting standards, and prepares students for newly minted and fast-growing careers in ethics, compliance, risk management, and corporate social responsibility. The chapters that follow lay out some challenges and opportunities that administrators and educators need to address in order to improve business ethics education and business school reputations in a post-Enron climate. Both traditional and experimental perspectives on delivering ethics in the curriculum are covered in conjunction with research that substantiates the potential for improving student ethics competencies after exposure to ethics coursework. Methods for incorporating ethics in various subjects, including accounting, corporate governance, environmentalism, global business, managerial decision making, and human resource management, are also given as part of the roadmap for advancing business ethics education.

**Peak Learning** Ronald Gross, 1991 Unlike studies which focus on theory or practice in adult education, this book presents a set of skills and techniques for self-education. Written by the author of *The Lifelong Learner: A Guide to Self-Development* (LJ 9 15 77), it aims to unlock the potential of a learner's mind by teaching fast, efficient, thorough, and productive learning skills. As the book describes peak learning, or the realist education, it is independent, unconstrained, noninstitutionalized development incorporating individual learning styles. The book's ideas are presented in a simple and easy-to-understand manner. Recommended for education collections. Samuel T. Huang, Northern Illinois Univ. Libs. DeKalb Library Journal.
