Pear By Itself:

Empty Representations Manuel García-Carpintero, Genoveva Martí, 2014-08-14 It is the linguistic job of singular terms to pick out the objects that we think or talk about But what about singular terms that seem to fail to designate anything because the objects they refer to don't exist We can employ these terms in meaningful thought and talk which suggests that they are succeeding in fulfilling their representational task A team of leading experts presents new essays on the much debated problem of empty reference and thought In the 1960s and 1970s Keith Donnellan David Kaplan Saul Kripke and Hilary Putnam initiated a revolution in the then standard conception of reference a concept at the core of philosophical inquiry The repercussions of the revolution particularly felt in metaphysics and epistemology were soon refined by other influential writers such as Tyler Burge Gareth Evans and John Perry They argued that some linguistic and mental representations have contents individuated by what they are about by ordinary referents of expressions such as proper names indexicals definite descriptions and common nouns i.e. by planets people or natural kinds The view was at odds with a central philosophical presumption at that time that cognitive and linguistic access to objective reality is indirect and accidental mediated by general descriptive characterizations the only constitutive semantic feature of the expressions hence its ontological and epistemological repercussions A turning point in the debate about how linguistic and mental representation reach external contents concerned the nature of empty mental and linguistic representations framed by means of the very same expressions crucially invoked in the Donnellan Kaplan Kripke Putnam arguments The papers in this volume address different aspects of reference and thought about the apparently non-existent

Being a Teacher Alison M. Brady, 2022-11-08 This book reconceptualizes teaching through an engagement with Jean Paul Sartre's early existentialist thought Against the grain of teacher accountability it turns to the demanding account of being human in Sartre's thought on the basis of which an alternative account of teaching can be developed It builds upon Sartre's key concepts related to the self freedom bad faith and the Other such that they might open up original ways of thinking about the practices of teaching Indeed given the everyday complexities that characterize teaching as well as the vulnerabilities and uncertainty that it so often involves this book ultimately aims to create a space in which to reimagine forms of accounting that move from technicist ways of thinking to existential sensitivity in relation to one's practice as a teacher
