Practitioner's Guide to Assessing Intelligence and Achievement

Jack A. Naglieri, Sam Goldstein, 2009-07-23 A complete guide to key intelligence and achievement tests and their effective use. The tools used in the assessment process have changed dramatically in recent years. School and clinical psychologists need a comprehensive yet focused resource to which they can turn to learn the basics of key intelligence and achievement tests and how to use them in their assessments of children and adults. With its practical and straightforward presentation, *Practitioner's Guide to Assessing Intelligence and Achievement* provides that resource. Coedited by two well known and respected scholars and researchers, Jack Naglieri and Sam Goldstein, the content in this timely book combines traditional and new conceptualizations of intelligence as well as ways to measure achievement. Truly readable and user friendly, this book provides professionals with a single source from which to examine ability and achievement tests along the same general criteria. Each chapter is written by a leading scholar and test developer and is consistently structured for easy comparison of each test that is examined. Coverage includes: The theory underlying each test; Description of each test; Tips for administering and scoring each test; Standardization norms and reliability of each scale; Practical guidance for the use of each test; Correspondence of each test to IDEA. A practical tool designed to aid clinical psychologists in understanding the strengths and weaknesses of the various tests presented, *Practitioner's Guide to Assessing Intelligence and Achievement* provides students and practitioners with the information they need for their practice and testing efforts to be consistent with recent updates in the field and how those assessment instruments relate to changes in the laws that influence test use. **An**

Still, 2024-08-19 Using a practical nuts and bolts approach to school based occupational therapy services, this unique text guides both entry level and experienced practitioners through the evaluation, intervention, and dismissal process in an educational setting. Beginning with an overview of the purpose of school based interventions, the authors map out current populations, programs, and legal and licensing standards to give school based practitioners the knowledge to practice safely and ethically. The book then explores how to successfully navigate the referral process from eligibility to intervention, incorporating helpful tips and references to help establish patterns of best practice. It also features numerous examples of current and reliable evaluations so that practitioners can expand their repertoire of assessments while ensuring a holistic avenue of care to reflect the distinct value of occupational therapy.
