assimilate concepts **Practical Logic** Soccio, 1991-12-01 *Practical Logic* Douglas J. Soccio, 1998-01-01 Ad Hominem Arguments Douglas Walton, 1998 A vital contribution to legal theory and media and civic discourse In the 1860s northern newspapers attacked Abraham Lincoln's policies by attacking his character using the terms drunk baboon too slow foolish and dishonest Steadily on the increase in political argumentation since then the argumentum ad hominem or personal attack argument has now been carefully refined as an instrument of oppo tactics and going negative by the public relations experts who craft political campaigns at the national level In this definitive treatment of one of the most important concepts in argumentation theory and informal logic Douglas Walton presents a normative framework for identifying and evaluating ad hominem or personal attack arguments Personal attack arguments have often proved to be so effective in election campaigns for example that even while condemning them politicians have not stopped using them In the media in the courtroom and in everyday confrontation ad hominem arguments are easy to put forward as accusations are difficult to refute and often have an extremely powerful effect on persuading an audience Walton gives a clear method for analyzing and evaluating cases of ad hominem arguments found in everyday argumentation His analysis classifies the ad hominem argument into five clearly defined subtypes abusive direct circumstantial bias poisoning the well and tu quoque you're just as bad arguments and gives methods for evaluating each type Each subtype is given a well defined form as a recognizable type of argument The numerous case studies show in concrete terms many practical aspects of how to use textual evidence to identify and analyze fallacies and to evaluate argumentation as fallacious or not in particular cases **Arguments and Reason-Giving** Matthew

W. McKeon, 2024 Arguments figure in our everyday practices of giving reasons For example we use arguments to advance reasons to explain why we believe or did something to justify our beliefs or actions to persuade others to do or to believe something and to advance reasons to worry or to fear that something is true This book is about our uses of arguments to advance their premises as reasons for believing their conclusions i.e. as reasons for believing that their conclusions are true

What exactly is involved when you successfully use an argument to advance the premises as reasons for believing the conclusion? Philosopher Matthew W. McKeon suggests there is more involved than one might think.

Informal Logical Fallacies Jacob E. Van Vleet, 2021-01-28 Critical thinking is now needed more than ever. This accessible and engaging book provides the necessary tools to question and challenge the discourse that surrounds us, whether in the media, the classroom, or everyday conversation. Additionally, it offers readers a deeper understanding of the foundations of analytical thought. *Informal Logical Fallacies: A Brief Guide* is a systematic and concise introduction to more than fifty fallacies, from anthropomorphism and argumentum ad baculum to reductionism and the slippery slope argument. This revised edition includes updated examples, exercises, and a new chapter on non-Western logical fallacies. With helpful definitions and relevant explanations, the author guides the reader through the realms of fallacious reasoning and deceptive rhetoric. This is an essential guide to philosophical reflection and clear thinking.

Scare Tactics Douglas Walton, 2013-06-29 *Scare Tactics*, the first book on the subject, provides a theory of the structure of reasoning used in fear and threat appeal argumentation. Such arguments come under the heading of the argumentum ad baculum, the argument to the stick, club, traditionally treated as a fallacy in the logic textbooks. The new dialectical theory is based on case studies of many interesting examples of the use of these arguments in advertising, public relations, politics, international negotiations, and everyday argumentation on all kinds of subjects. Many of these arguments are amusing; once you see the clever tactic used, others are scary. Some of the arguments appear to be quite reasonable, while others are highly suspicious or even outrageously fraudulent. In addition to the examples taken from logic textbooks, other cases treated come from a variety of sources, including political debates, legal arguments, and arguments from media sources like magazine articles and television ads. The purpose of this book is to explain how such arguments work as devices of persuasion and to develop a method for analyzing and evaluating their reasonable and fallacious uses in particular cases. The book shows how such arguments share a common structure, revealing several distinctive forms of argument nested within each other. Based on its account of this cognitive structure, the new dialectical theory presents methods for identifying, analyzing, and evaluating these arguments as they are used in specific cases. The book is a scholarly contribution to argumentation theory. It is written in an accessible style and uses many colorful and provocative examples of fear and threat appeal arguments that are suitable for classroom discussions. The matters treated will be of interest to professionals and students in law, critical thinking, advertising, speech, communication, informal logic, cognitive science, rhetoric, and media studies.
