Practical Problems In Research Methods A Casebook:

Practical Problems in Research Methods Estabrook Verdugo, 2016-09-13 Each of the 53 cases presents a practical problem faced by a researcher and the solution he or she selected. The questions encourage students to evaluate the researcher's solution and consider alternatives. All cases are drawn from the published literature. Your students will evaluate real problems faced by practicing researchers. All major topics in research methods are covered. Here are samples from the seven major sections of the book: Sampling, Sampling Hispanic Adults by Telephone, Measurement, Social Desirability, Operational Definitions, Defining Physical Abuse of Children, Procedures, Controlling the Distribution of a Questionnaire, Experimental and Causal, Comparative Design, Forming Comparison Groups in Classroom Research, on Reading, Ethical Considerations, Prescreening Adolescents for Stress, Interpretation of Results, Health Risk Behaviors of Adolescents. The extensive instructor's guide provides discussion points as well as samples of students' answers obtained in the field tests. This supplementary book makes dry textbook principles come alive. Students learn that research is a dynamic process that for many problems there are competing solutions, each with its own advantages and drawbacks. The 35 short cases are ideal for classroom discussions. The 18 longer ones make great homework assignments. [Practical Problems in Research Methods](#)

Estabrook Verdugo, 1998 **American Book Publishing Record**, 1999 **Social Research in the Judicial Process** Wallace D. Loh, 1984-09-17 How to inform the judicial mind. Justice Frankfurter remarked during the school desegregation cases is one of the most complicated problems. Social research is a potential source of such information. Indeed in the 1960s and 1970s with activist courts at the forefront of social reform, the field of law and social science came of age. But for all the recent activity and scholarship in this area, few books have attempted to create an intellectual framework, a systematic introduction to applied social legal research. *Social Research in the Judicial Process* addresses this need for a broader picture. Designed for use by both law students and social science students, it constructs a conceptual bridge between social research, the realm of social facts and judicial decision making, the realm of social values. Its unique casebook format weaves together judicial opinions, empirical studies, and original text. It is a process-oriented book that teaches skills and perspectives, cultivating an informed sensitivity to the use and misuse of psychology, social psychology, and sociology in appellate and trial adjudication. Among the social legal topics explored are school desegregation, capital punishment, jury impartiality, and eyewitness identification. This casebook is remarkable for its scope, its accessibility, and the intelligence of its conceptual integration. It provides the kind of interdisciplinary teaching framework that should eventually help lawyers to make knowledgeable use of social research and social scientists to conduct useful research within a legally sophisticated context.
