## **Project Management Tools Cheap Ideas:**

*Semantic Technologies in Idea Management Systems: A Model for Interoperability, Linking and Filtering*, Idea Management Systems are web applications that implement the notion of open innovation through crowdsourcing. Typically, organizations use those kind of systems to connect to large communities in order to gather ideas for improvement of products or services. Originating from simple suggestion boxes, Idea Management Systems advanced beyond collecting ideas and aspire to be a knowledge management solution capable to select best ideas via collaborative as well as expert assessment methods. In practice, however, the contemporary systems still face a number of problems usually related to information overflow and recognizing questionable quality of submissions with reasonable time and effort allocation. This thesis focuses on idea assessment problem area and contributes a number of solutions that allow to filter, compare and evaluate ideas submitted into an Idea Management System. With respect to Idea Management System interoperability, the thesis proposes a theoretical model of Idea Life Cycle and formalizes it as the Gi2MO ontology which enables to go beyond the boundaries of a single system to compare and assess innovation in an organization wide or market wide context. Furthermore, based on the ontology, the thesis builds a number of solutions for improving idea assessment via community opinion analysis, MARL annotation of idea characteristics, Gi2MO Types and study of idea relationships, Gi2MO Links. The main achievements of the thesis are application of theoretical innovation models for practice of Idea Management to successfully recognize the differentiation between communities' opinion metrics and their recognition as a new tool for idea assessment, discovery of new relationship types between ideas and their impact on idea clustering. Finally, the thesis outcome is establishment of Gi2MO Project that serves as an incubator for Idea Management solutions and mature open source software alternatives for the widely available commercial suites. From the academic point of view, the project delivers resources to undertake experiments in the Idea Management Systems area and managed to become a forum that gathered a number of academic and industrial partners.

Project Management, 2nd Edition Patel Bhavesh, 2012. The book discusses all the issues related to Project Management. Strategic considerations, recognition of the human factor and need for administrative set up are interwoven in this book while developing the main theme of the financial side of project management. New in this Book: 1. New chapters titled Infrastructure Projects and Project Financing have been added. 2. Economic and Social Cost Benefit and Network Analysis and Execution Plan have been enriched with additional material. 3. Components of interest rates have been elaborated and the concepts of cost of capital and required rate of return built on it. 4. More examples and real cases and enhanced diagrammatic explanation. 5. Chapterization scheme has been revised in the line of phases of project life cycle. 6. References, footnotes and web links have been added to give readers access to extra material for further reading. Key Features: 1. Strategy, human aspect, administrative issues and system approach have been integrated in a single thread without compromising on conceptual clarity and simplicity. 2. Use of spreadsheet has been extensively explained in chapters.

where it is most applicable 3 A continuous case has been built around the theme of each chapter throughout the book
