## **Shepherd Of An Immigrant People:**

Christian Theology in the Age of Migration Peter C. Phan, 2020-01-13 We are living in the Age of Migration and migration has a profound impact on all aspects of society and on religious institutions While there is significant research on migration in the social sciences little study has been done to understand the impact of migration on Christianity This book investigates this important topic and the ramifications for Christian theology and ethics It begins with anthropological and sociological perspectives on the mutual impact between migration and Christianity followed by a re reading of certain events in the Hebrew Scripture the New Testament and Church history to highlight the central role of migration in the formation of Israel and Christianity Then follow attempts to reinterpret in the light of migration the basic Christian beliefs regarding God Christ and church The next part studies how migration raises new issues for Christian ethics such as human dignity and human rights state rights social justice and solidarity and ecological justice The last part explores what is known as Practical Theology by examining the implications of migration for issues such as liturgy and worship spirituality architecture and education

**A Shepherd's Journey** Ven. Dr. Stephen Adedòtun Adesanya Ph., 2012-01-25 Adesanya's narrative is sober reflective and unbelievably forgiving Those interested in global Anglicanism way beyond attention grabbing headlines will find his experiential perspectives on the practical workings of theology across cultures and continents very instructive The book proposes great insights into comparative Anglicanism and offers pathways to harmony within worldwide Anglicanism Stephen opines neither Europe America is misleading the world nor the Global South mis evangelizing the faithful His call is the need for dialogue within Anglicanism Prof Adk Adk Ohio State University Columbus USA

**The Paradox of Planetary Human Entanglements** Inocent Moyo, Sabelo J. Ndlovu-Gatsheni, 2022-12-30 The Paradox of Planetary Human Entanglements provides a nuanced understanding of the complexity of planetary human entanglements in this age of increased borderisation and territorialisation racism and xenophobia and inclusion and exclusion One of the greatest paradoxes of the 21st century is that of increased planetary human entanglements enabled by globalisation on the one hand and by the rising tide of exclusionary right wing politics of racism xenophobia and the building of walled states on the other The characteristic feature of this paradox is the unrestrained move towards the detention and incarceration of those who attempt to migrate This brings to the fore the issue of borders in terms of their materiality and symbolism and how this mediates belonging citizenship and the ethics or lack thereof and politics of living together This book shows that at the core of border and migration restrictions is the desire to exclude certain categories of people which aptly demonstrates that borders in their materiality are not for everyone but for those who are considered undesirable migrants The authors examine questions of borders nationalism migration immigration and belonging setting the basis of a campaign for planetary humanism grounded on human dignity which transcends ethnicity and nationality This book will be a useful resource for students scholars and researchers of African Studies Border Studies Migration Studies Development Studies International

*Christianity and Migration* Peter C. Phan,Oxford Editor,2025-10-07 This book essays a not the Christian theology of migration The phenomenon of human migration that is the movement of people to and settlement temporary or permanent in a new area or country its causes and reasons and its historical anthropological social political legal and cultural dimensions have been widely studied and reasonably well understood and the next chapter will discuss them in detail By contrast theology as an academic discipline seems least capable of illuminating this human phenomenon It appears to most people outside the church and its educational institutions to be at best an esoteric subject and at worst a convoluted and useless mumbo jumbo especially when liberally sprinkled with Greek and Latin phrases Why not leave the study of migration to scholars in history sociology anthropology economics politics and law who albeit no less infected with highfalutin language than theologians do at least try to offer practical policies and effective strategies either for or against immigration Provided by publisher      **Migration and Mobility in the Ancient Near East and Egypt - the Crossroads IV** Ludovica

Bertolini,Jana Mynarova,Federico Zangani,2024-06-15 Movement and mobility represent intertwined concepts that have persisted throughout human history The act of moving from one place to another is however intricately tied to the challenges that hinder it These obstacles can either be natural in origin or the product of human design aimed at constraining the movement of individuals or groups Furthermore movement and mobility can also manifest themselves within society encompassing the fluid shifts of people within the social hierarchy and the transitions between various social groups The transfer of words technologies and religious ideologies often accompanies these human movements The region of ancient Western Asia and northeast Africa serves as a rich repository of evidence for these forms of movement and mobility extensively documented through written sources and material culture The essays collected in this volume variously examine the political dimensions of movement and mobility how ideas concepts and languages move across boundaries and the material evidence for cultural interactions      **Studying Diversity, Migration and Urban Multiculture** Mette Louise

Berg,Magdalena Nowicka,2019-07-02 Anti migrant populism is on the rise across Europe and diversity and multiculturalism are increasingly presented as threats to social cohesion Yet diversity is also a mundane social reality in urban neighbourhoods With this in mind Studying Diversity Migration and Urban Multiculture explores how we can live together with and in difference What is needed for conviviality to emerge and what role can research play This volume demonstrates how collaboration between scholars civil society and practitioners can help to answer these questions Drawing on a range of innovative and participatory methods each chapter examines conviviality in different cities across the UK The contributors ask how the research process itself can be made more convivial and show how power relations between researchers those researched and research users can be reconfigured in the process producing much needed new knowledge and understanding about urban diversity multiculturalism and conviviality Examples include embroidery workshops with diverse

faith communities arts work with child language brokers in schools and life story and walking methods with refugees  
Studying Diversity Migration and Urban Multiculture is interdisciplinary in scope and includes contributions from  
sociologists anthropologists and social psychologists as well as chapters by practitioners and activists It provides fresh  
perspectives on methodological debates in qualitative social research and will be of interest to scholars students
