Shingu Message From Nature:

New Directions in Picturebook Research Teresa Colomer, Bettina Kümmerling-Meibauer, Cecilia Silva-Díaz, 2010-07-12 In this new collection children's literature scholars from twelve different countries contribute to the ongoing debate on the importance of picturebook research focusing on aesthetic and cognitive aspects of picture books. Contributors take interdisciplinary approaches that integrate different disciplines such as literary studies, art history, linguistics, narratology, cognitive psychology, sociology, memory studies, and picture theory. Topics discussed include intervisuality, twist endings, autobiographical narration, and metaliterary awareness in picturebooks. The essays also examine the narrative challenges of first person narratives, ellipsis, and frame breaking in order to consider the importance of mindscape as a new paradigm in picturebook research. Tying picturebook studies to studies in childhood, multimodality, and literacy, this anthology is a representative of the different opportunities for research in this emerging field. **From Waves in Complex Systems to Dynamics of Generalized Continua** Kolumban Hutter, Yi-Chung Shu, 2011 The book reviews recent research activities in applied mechanics and applied mathematics such as the fields of solid fluid constitutive modeling for coupled fields, applications of geophysical environmental context in judicious numerical computational implementations. The book aims to merge foundation aspects of continuum mechanics with modern technological applications, notably on reviewing recent advances in the treated subjects in an attractive presentation accessible to a wide readership of engineering and applied sciences. **Renzo Piano** Lorenzo Ciccarelli, 2023-10-19 Renzo Piano is one of the world's greatest living architects and creator of a host of iconic modern buildings including the Pompidou in Paris, the Menil Collection in Texas, Kansai Airport in Japan, the Shard in London, and the new Whitney Museum of American Art in New York. Written and created in collaboration with the Piano Foundation in Genoa, this richly illustrated volume covers the early work as well as the most recent designs, making a complete survey of his career to date. Starting with his beginnings with the Pompidou Centre in the 1970s in collaboration with Richard Rogers, the story continues up to construction of one of his latest works, a spectacular new bridge in Genoa in 2020. The book explores all of the studio's main projects: the public spaces and museums, airports, theatres, and libraries. As well as giving unique insights into the creative process of Piano himself, the book includes numerous unpublished designs and photographs. In the process, the book reveals Piano's unique way of handling light and space, as well as his particular attention to the social implications of the profession of architect and the relationship of buildings to their urban environment and landscape. **Form Function Finland**, 2000 **Landscape Architecture**, 1998 **Bibliographic Guide to Art and Architecture** New York Public Library.
