Shining South:

Discovering the South Jennifer Ritterhouse, 2017-02-08 During the Great Depression the American South was not merely the nation's number one economic problem as President Franklin Roosevelt declared. It was also a battlefield on which forces for and against social change were starting to form. For a white southern liberal like Jonathan Daniels, editor of the *Raleigh News and Observer*, it was a fascinating moment to explore. Attuned to culture as well as politics, Daniels knew the true South lay somewhere between Erskine Caldwell's *Tobacco Road* and Margaret Mitchell's *Gone with the Wind*. On May 5, 1937, he set out to find it, driving thousands of miles in his trusty Plymouth and ultimately interviewing even Mitchell herself. In *Discovering the South*, historian Jennifer Ritterhouse pieces together Daniels's unpublished notes from his tour along with his published writings and a wealth of archival evidence to put this one man's journey through a South in transition into a larger context. Daniels's well-chosen itinerary brought him face to face with the full range of political and cultural possibilities in the South of the 1930s: from New Deal liberalism and social planning in the Tennessee Valley Authority to Communist agitation in the Scottsboro case; to planters and industrialists' reactionary worldview and repressive violence. The result is a lively narrative of black and white southerners fighting for and against democratic social change at the start of the nation's long civil rights era. Sikh Nationalism and Identity in a Global Age Giorgio Shani, 2007-12-06 *Sikh Nationalism and Identity in a Global Age* examines the construction of a Sikh national identity in post-colonial India and the diaspora and explores the reasons for the failure of the movement for an independent Sikh state, Khalistan. Based on a decade of research, it is argued that the failure of the movement to bring about a sovereign Sikh state should not be interpreted as resulting from the weakness of the communal ties which bind members of the Sikh nation together, but points to the transformation of national identity under conditions of globalization. Globalization is perceived to have severed the link between nation and state, and through the proliferation and development of Information and Communications Technologies (ICTs) has facilitated the articulation of a transnational diasporic Sikh identity. It is argued that this diasporic identity potentially challenges the conventional narratives of international relations and makes the imagination of a post-Westphalian community possible. Theoretically innovative and interdisciplinary in approach, it will be primarily of interest to students of South Asian studies.
