## **Short History Of Economic Progress Course In Economic History:**

A Short History of Economic Progress Y.S. Brenner, 2014-06-17 Y S Brenner is an economist whose main concern is with development and this attitude is reflected in his approach to economic history He begins this seminal study in the era of the Reformation in Europe and bases it on the hypothesis that once started economic progress will spread over ever increasing parts of the earth wherever and whenever conditions become suitable From this point of view he examines the nature of the impediments which prevent the more rapid and general progress of mankind towards greater material affluence while at the same time considering the positive growth promoting factors in the various economies Thus he provides an analysis of economic progress in the developed countries showing which natural social political and cultural forces promoted such progress and which delayed or hindered it He attempts to explain why European nations took several decades to emulate the achievements of Britain and why nations in other parts of the world such as Japan and Russia were unable for a considerable time to match the advances made in parts of Western Europe and the United States Finally he attempts to explain why the developing countries are still finding it so difficult to catch up with the economic progress of the more advanced nations Y S Brenner was Head of the Department of Economics at Cape Coast University in Ghana The book arose from a series of lectures on economic development he delivered there during the years 1966 1967 This book was first published in 1969

**Ugarit-Forschungen**, 2015 Colonialism and Development Michael A. Havinden, David Meredith, 2002-06-01 British colonial rule of the tropics is the critical background to contemporary development issues This study of Britain's economic and political relationship with its tropical colonies provides detailed analyses of trade and policy The considerations of past successes and failures elucidate current opportunities and developments No other book covers this broad topic with such detail and clarity **Class list** Salem Mass, publ. libr, 1895 **Looking into the Seeds of Time** Y. S. Brenner, 2021-12-16 This stunning refreshing work combines the history of economics and the practice of modern development It is predicated on Brenner's view that there is no individual freedom without economic security and that such security depends upon progress in both the natural and social sciences Social institutions determine the pace and direction of technological advancement and scientific and technological achievements determine which forms of social reorganization are possible and which are illusory As all living is action and living implies choices any theory of development must start with the person Economic laws obtain

only in relation to specific forms of social existence Advanced societies are technically capable of providing for basic needs but are not yet convinced of their ability to do so Modern life still reflects the fears of a society still trying to escape the anxieties demons and ghosts of a long dark era of unemployment and starvation The problem of development is the contradiction between technological potentials and cultural inheritances Looking into the Seeds of Time was originally written with the belief that the growing mastery of nature by humanity would curb egoistic impulses and replace competitive with cooperative goals While the same spirit pervades this new edition the work reveals how political as well as economic processes make the goals of prosperity harder to achieve The work reveals a rare insight into the mechanisms of the marketplace and how they can be examined in a comparative historical context across nations as different as the United States Great Britain and Japan and from the Reformation to the modern era of bourgeois consolidation This is institutional economics at its very best

**Books in Print** ,1979 **Bibliography of Historical Works Issued in the United Kingdom: 1966-1970** ,1972 Creating A World Economy Alan K. Smith,2019-04-02 This is an exploration in world history that examines complex and intriguing questions concerning the origins of the first truly global economy centered in Europe which served in turn as a solid basis for the later emergence of the modern world system Professor Smith first examines the remarkable progress achieved by many cultures around the world achievements that for some time far exceeded anything then found in Europe The study then probes beyond traditionalism as a sufficient explanation of the inability of these societies to maintain the economic momentum that had begun so auspiciously and carefully examines the experience of European societies by way of comparison finding that remarkably similar processes tended to unfold at first regions of Europe that made the earliest gains in material progress were like other parts of the world unable to sustain these advances Still in some parts of Europe particularly the Netherlands and England a new alignment of social forces was yielding the social system that would eventually evolve into capitalism This breakthrough allowed for continued dynamic material progress particularly for the English Able to establish an unprecedented commercial dominance in vast reaches of the world the British found themselves at the hub of a new world economy much more complex than any earlier intercultural commercial system The book delineates the systemic roles assumed by the various regions of the world and by European merchant capital and explains the tensions within this system that ensured its continued dynamism and eventual transformation into the current world
