Shockwave The Countdown To Hiroshima:

Shockwave Stephen Walker, 2006-05-22 August 6th 1945 9 15 a m Six miles above Hiroshima the bombardier of the Enola Gay releases an atomic bomb into the freezing skies Seconds later the city is obliterated in a single monumental blast of fire The destruction is immediate and catastrophic as if a small sun had suddenly exploded Tens of thousands of people are instantly annihilated In that moment the world will never be the same again Combining a rich array of interviews with gripping storytelling Stephen Walker's Shockwave presents an extraordinary and unforgettably moving portrait of one of the defining events of the twentieth century Shockwave Stephen Walker, 2023-11-21 A riveting minute by minute account of the World War II bombing of Hiroshima from early testing to the cataclysmic event and its aftermath On a quiet Monday morning in August 1945 a five ton bomb dubbed Little Boy by its creators was dropped from an American plane onto the Japanese city of Hiroshima On that day a firestorm of previously unimagined power was unleashed on a vibrant metropolis of 300 000 people leaving one third of its population dead its buildings and landmarks incinerated It was the terrifying dawn of the Atomic Age spawning decades of paranoia mistrust and a widespread and very real fear of the potential annihilation of humanity Author Stephen Walker brilliantly recreates the three terrible weeks leading up to the wartime detonation of the atomic bomb from the first successful test in the New Mexico desert to the cataclysm and its aftermath presenting the story through the eyes of the pilots scientists civilian victims and world leaders who stood at the center of earth shattering drama It is a startling moving frightening and remarkable portrait of an extraordinary event a shockwave whose repercussions can Shockwave: Countdown to Hiroshima Stephen Walker, 2020-07-23 THE NEW YORK TIMES be felt to this very day BESTSELLER A stunning book among the most immediate and thrilling works of history I have ever read **Unfinished Atomic Bomb** Cassandra Atherton, David Lowe, Alyson Miller, 2017-12-26 In its diversity of perspectives The Unfinished Atomic Bomb Shadows and Reflections is testament to the ways in which contemplations of the A bomb are endlessly shifting rarely fixed on the same point or perspective The compilation of this book is significant in this regard offering Japanese American Australian and European perspectives In doing so the essays here represent a complex series of interpretations of the bombing of Hiroshima and its implications both for history and for the present day From Kuznick's extensive biographical account of the Hiroshima bomb pilot Paul Tibbets and contentious questions about the moral and strategic efficacy of dropping the A bomb and how that has resonated through time to Jacobs reflections on the different ways in which Hiroshima and its memorialization are experienced today each chapter considers how this moment in time emerges persistently in public and cultural consciousness The discussions here are often difficult sometimes controversial and at times oppositional reflecting the characteristics of A bomb scholarship more broadly. The aim is to explore the various ways in which Hiroshima is remembered but also to consider the ongoing legacy and impact of atomic warfare the reverberations of which remain powerfully felt The Cities Book Lonely Planet, 2017-10-01 Lonely Planet's bestselling

Five Days in August Michael D. Gordin,2015-08-18 Most Americans believe that the Second World War ended because the two atomic bombs dropped on Japan forced it to surrender Five Days in August boldly presents a different interpretation that the military did not clearly understand the atomic bomb s revolutionary strategic potential that the Allies were almost as stunned by the surrender as the Japanese were by the attack and that not only had experts planned and fully anticipated the need for a third bomb they were skeptical about whether the atomic bomb would work at all With these ideas Michael Gordin reorients the historical and contemporary conversation about the A bomb and World War II Five Days in August explores these and countless other legacies of the atomic bomb in a glaring new light Daring and iconoclastic it will result in far reaching discussions about the significance of the A bomb about World War II and about the moral issues they have spawned

Constructivism and the New Social Studies Geoffrey Scheurman, Ronald W. Evans, 2018-07-01 The New Social Studies refers to a flurry of academic and commercial activity during the 1960s and 1970s that resulted in the mass development and dissemination of revolutionary classroom materials and teacher resources In science as well as social studies a spirit of inquiry based teaching filled the air during this time resulting in the development of curricula that were both pedagogically innovative and intellectually rigorous Constructivism and the New Social Studies contains a collection of classic lessons from some of the most successful projects of the era providing a resource of exceptional ideas and materials that have stood the test of time These revealing artifacts are presented with commentaries from some of the original directors of major projects including Edwin Fenton Barry Beyer and Suzanne Helburn In addition to American and World History groundbreaking

lessons are represented in Economics Government Sociology and Geography including the Public Issues Series Fred Newann The Amherst History Project Richard Brown and Geoffrey Scheurman and Teaching American History The Quest for Relevancy Allan Kownslar Gerald Ponder and Geneva Gay and Man A Course of Study Peter Dow With a Foreword by Jerome Bruner the volume not only provides a resource of exceptional curriculum ideas and actual materials it also builds a lucid bridge between the theoretical ideas of constructivism and the pedagogical principles of inquiry learning With over 50 years of expertise from curriculum history and social studies pedagogy the editors make the case that guided inquiry as presented in these projects was constructivist by design offering a range of instructional methods that begin with questions rather than answers and considers progress in terms of the development of analytical skills and experimental habits of mind rather than the mere acquisition of knowledge Projects developed during the New Social Studies serve as both an interesting historical archive of powerful curricular innovations as well as a treasure trove of actual lessons and materials still useful in social studies classrooms striving to become more constructivist The lessons and other materials we chose should be relevant if you are an historian researcher theorist or teacher of any subject but it will be especially significant if you are interested in the nature of social civic or historical literacy in America including how to teach for authentic achievement in those areas

between the United States and the Soviet Union never broke out into a real war All of these remarkable non events flow from a set of unwritten but compelling rules for war making that appeared spontaneously after the atomic bombing of Hiroshima and Nagasaki along with a taboo against any further use of nuclear weapons which have so far been universally respected The most important effect of these rules is that every nation with a nuclear arsenal is virtually immune to attack by the armed forces of any other nation The same rules seem to explain the global spread of insurgencies and the successes and failures of the non proliferation regime These developments are not the result of a conventional understanding of nuclear deterrence but instead are based on the well documented history of armed conflict in the world during the past sixty years Forbidden Wars presents a unique insight that casts new light on America's foreign policy Nuclear Dawn James P.
