## **Principles And Problems In Physical Chemistry For Biochemists:**

Principles and Problems in Physical Chemistry for Biochemists Nicholas C. Price, Raymond A. Dwek, 1979 What use is physical chemistry to the student of biochemistry and biology This central question is answered in this book mainly through the use of worked examples and problems The book starts by introducing the laws of thermodynamics and then uses these laws to derive the equations relevant to the student in dealing with chemical equilibria including the binding of small molecules to proteins properties of solutions acids and bases and oxidation reduction processes The student is thus shown how a knowledge of thermodynamic qualities makes it possible to predict whether and how a reaction will proceed Thermodynamics however gives no information about how fast a reaction will happen The study of the rates at which processes occur kinetics forms the second main theme of the book This section poses and answers questions such as how is the rate of a reaction affected by temperature pH ionic strength and the nature of the reactants These same ideas are then shown to be useful in the study of enzyme catalysed reactions *Physikalische Chemie für Biologen und Biochemiker* N.C. *Fundamentals of Biochemistry* J L Jain & Sunjay Jain & Nitin Jain, 2022 This book has been primarily designed to familiarize the students with the basic concepts of biochemistry such as biomolecules bioenergetics metabolism hormone biochemistry nutrition biochemistry as well as analytical biochemistry The book is flourished with numerous illustrations and molecular structures which would not only help the students in assimilating extensive information on a spectrum of concepts in biochemistry but also help them in retaining the concepts in an effective manner
