Recognizing Spirituality The Interface Between Faith And Social Work:

Recognizing Spirituality Rae Shirley Lindsay, 2002 Education in the helping professions has tended to adopt a secular view of human beings focusing on aspects of human behavior which are empirically measurable and avoiding the more irrational elements The religious beliefs and spiritual values of both students and clients have been ignored Rae Lindsay argues that this prevents students from fully exploring their own attitudes and biases and increases the likelihood that these personal values will be foisted on clients It also reduces the chances that practitioners will explore the spiritual factors influencing clients In a multicultural country such as Australia it is extraordinary that varied religious and spiritual beliefs should not be considered in the relationship between the professional and the client Pretending that these beliefs don't exist or are irrelevant is to ignore an important dimension of human existence and interaction Little has been written on this problem in an Australian cultural context This book presents opinions of social work educators and practitioners and statistics about Australian religious beliefs It also discusses the stages of faith development The persistence and strength of spiritual and religious beliefs is clear from all sources Rae Lindsay challenges the status quo and argues that spirituality and religion should be included in contemporary professional discourses Oxford Textbook of Spirituality in Healthcare Mark Cobb, Christina M Puchalski, Bruce Rumbold, 2012-08-09 Spirituality and healthcare is an emerging field of research practice and policy Healthcare organisations and practitioners are therefore challenged to understand and address spirituality to develop their knowledge and implement effective policy This is the first reference text on the subject providing a comprehensive overview of key topics *Religious Literacy in Policy and Practice* Adam Dinham, Matthew Francis, 2016-08-17 This valuable book is the first to bring together theory and policy with analysis and expertise on practices in key areas of the public realm to explore what religious literacy is why it is needed and what might be done about it It makes the case for a public realm which is well equipped to engage with the plurality and pervasiveness of religion and belief whatever the individual's own stance It is aimed at academics policy makers and practitioners interested in the policy and practice implications of the continuing presence of religion and belief in the public sphere **Practising Spirituality** Laura Beres, 2017-03-07 The steady increase in economic social environmental and political hardships experienced by many around the globe has led in recent years to a corresponding growth in the importance ascribed to finding meaning in life and to addressing the bigger questions As deliverers of care and assistance to people across many different faiths and cultures whose lives are impacted directly by these hardships current and future social workers must learn to apply concepts of spirituality in their own professional practice In this unique and inspiring book a diverse group of authors draws deeply on their own experiences of spirituality in practice providing a fascinating and often moving exploration of how meaning is derived in a variety of different contexts Topics discussed include Mindfulness meditation and the practice of Falun Gong The interaction between spirituality social justice and professional practice The role of spirituality in the provision of palliative

care Indigenous spiritualities interconnectedness and human animal bonds The role of spirituality in providing hospitality and acceptance in practice Enriched by a wealth of case studies and a strong focus on critical reflection throughout Practising Spirituality is an important and thought provoking read for students and practitioners across the full range of health and social care disciplines from social work and counselling to nursing youth work and beyond

Re-imagining Religion and Belief Christopher Baker, Beth R. Crisp, Adam Dinham, 2018-08-29 The need to reimagine religion and belief is precipitated by their greater visibility in public life Meanwhile social policy responses often see them from a problem based rather than an asset based approach However with growing diversity of religion and belief in every sector comes the potential for new dialogues across previously impermeable policy and disciplinary silos This volume brings together leading international authors to critically consider these challenges within legal and policy frameworks including security and cohesion welfare law health and social care inequality cohesion extremism migration and abuse It challenges policy makers to re imagine religion and belief as an integral part of public life that contains resources practices forms of knowledge and experience that are essential to a coherent policy approach to diversity enhanced democracy and participation
