research based reading practices Upon further examination he discovered that the reading establishment generally rejects the product of legitimate science choosing instead to engage in a never ending interfusion of the latest innovations modifications and gimmicks This condition Anthony Pedriana observes has a disparate impact on poor and minorities those who suffer from dyslexia and other forms of reading disability and those for whom English is a second language But unlike Flesch who stressed the differences between phonics and holistic practices Pedriana seeks common ground among reading practitioners He notes that there is plenty in the data for both sides to love and that failing to take advantage of that convergence is to mock our high minded expressions of children first
