The Life-Changing Science of Detecting Bullshit John V. Petrocelli, 2025-09-23 Expanding upon his viral TEDx Talk psychology professor and social scientist John V Petrocelli reveals the critical thinking habits you can develop to recognize and combat pervasive false information that harms society in *The Life Changing Science of Detecting Bullshit* Bullshit is the foundation of contaminated thinking and bad decisions leading to health consequences financial losses legal consequences broken relationships and wasted time and resources No matter how smart we believe ourselves to be we re all susceptible to bullshit and we all engage in it While we may brush it off as harmless marketing sales speak or as humorous embellished claims it s actually much more dangerous and insidious It s how Bernie Madoff successfully swindled billions of dollars from even the most experienced financial experts with his Ponzi scheme It s how the protocols of Mao Zedong s Great Leap Forward resulted in the deaths of 36 million people from starvation Presented as truths by authority figures and credentialed experts bullshit appears legitimate and we accept their words as gospel If we don t question the information we receive from bullshit artists to prove their thoughts and theories we allow these falsehoods to take root in our memories and beliefs This faulty data affects our decision making capabilities sometimes resulting in regrettable life choices But with a little dose of skepticism and a commitment to truth seeking you can build your critical thinking and scientific reasoning skills to evaluate information separate fact from fiction and see through bullshitter spin In *The Life Changing Science of Detecting Bullshit* experimental social psychologist John V Petrocelli provides invaluable strategies not only to recognize and protect yourself from everyday

bullshit but to accept your own lack of knowledge about subjects and avoid in engaging in bullshit just for societal conformity With real world examples from people versed in bullshit who work in the used car real estate wine and diamond industries Petrocelli exposes the red flag warning signs found in the anecdotal stories emotional language and buzzwords used by bullshitters that persuade our decisions By using his critical thinking defensive tactics against those motivated by profit we will also learn how to stop the toxic misinformation spread from the social media influencers fake news and op eds that permeate our culture and call out bullshit whenever we see it

Eat Fat, Get Fit Kusha Karvandi, 2017-04-30 Discover the healthy power of fullness and flavor in the important nutrient known as fat in a guide to customizing your diet by the founder of Exerscribe When you re trying to lose weight it s reasonable to want to lose body fat in specific areas You want flat abs a tighter tummy leaner legs or less flabby arms But often you re told it just isn t possible Nonsense Kusha Karvandi has seen his clients get the results they want faster than ever with a customized approach helping them become their own diet detective to find which foods work best for their body Now he shares his discoveries so you can have the body and confidence you desire The problem with the health and fitness industry is that it makes people think they re just weak and that the best way to achieve the body they want is to suck it up and push harder Reality shows exhaust participants with hours of daily exercise and extremely low calorie diets but if more is better why do the majority rebound and gain the weight back again and again The truth is you re stronger than you think It isn t that you somehow lack willpower or discipline it s that you just don t have the right heuristics yet which one of Karvandi s mentors defined as the ability to make a decision based on limited amounts of information The beauty of a heuristic is that it doesn t drain your willpower like calorie counting or fad diets may In this book he shows how to craft your own diet heuristic so you can make good eating decisions no matter where you are or how much willpower you have Though everyone has their own individual natural set point when it comes to weight our bodies were not programmed for obesity But when we began eating unnatural processed foods vegetable oils and refined carbohydrates for example we shifted our bodies toward fat storage rather than fat burn By avoiding foods that force your body to store fat you can lose weight quickly and easily and create unstoppable momentum in your quest for fitness success
