*PISA The PISA 2003 Assessment Framework Mathematics, Reading, Science and Problem Solving Knowledge and Skills* OECD, 2004-03-02 The PISA 2003 Assessment Framework presents the conceptual underpinning of the PISA 2003 assessments Within each assessment area the volume defines the content that students need to acquire the processes that need to be performed and the contexts in which knowledge and skills are applied **PISA**

**2012 Results: Creative Problem Solving (Volume V) Students' Skills in Tackling Real-Life Problems** OECD, 2014-04-01 This fifth volume of PISA 2012 results presents an assessment of student performance in problem solving which measures students capacity to respond to non routine situations in order to achieve their potential as constructive and reflective citizens

Complex Problem Solving Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted

multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other. Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holistic approach to investigating and theorizing about these abilities. The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS, DDM, and CDC. This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another, what learning conditions result in transferable knowledge and skills, and how these features can be trained.
