Probability Theory An Analytic View

Daniel W. Stroock

Probability Theory An Analytic View:

Probability Theory, an Analytic View Daniel W. Stroock, 1999 This revised edition is suitable for a first year graduate course on probability theory It is intended for students with a good grasp of introductory undergraduate probability and is a reasonably sophisticated introduction to modern analysis for those who want to learn what these two topics have to say about each other The first part of the book deals with independent random variables Central Limit phenomena the general theory of weak convergence and several of its applications as well as elements of both the Gaussian and Markovian theory of measures on function space The introduction of conditional expectation values is postponed until the second part of the book where it is applied to the study of martingales This section also explores the connection between martingales and various aspects of classical analysis and the connections between Wiener's measure and classical potential theory

Probability Theory: an Analytic View Daniel W. Stroock, 1993 This section also explores the connection between martingales and various aspects of classical analysis and the connections between Wiener's measure and classical potential theory Although the book is primarily intended for students and practitioners of probability theory and analysis it will also be a valuable reference for those in fields as diverse as physics engineering and economics

Martingale in diskreter Zeit Harald Luschgy, 2012-08-09 Dieses Lehrbuch bietet neben einer umfassenden Darstellung der Theorie der Martingale in diskreter Zeit auch ausführliche Anwendungen Die behandelten Themen reichen von klassischem Material über Zerlegungen von stochastischen Prozessen und Submartingalen quadratische Variation und quadratische Charakteristik Kompensatoren und Potentiale Stoppzeiten und gestoppte Prozesse Ungleichungen Konvergenz und lokale Konvergenz starke Gesetze der großen Zahlen Gesetze vom iterierten Logarithmus und den Zusammenhang mit Markov Prozessen bis zu neueren Ergebnissen über exponentielle Ungleichungen einen stabilen zentralen Grenzwertsatz mit exponentieller Rate und die optionale Zerlegung universeller Supermartingale Die Anwendungen betreffen etwa das finanzmathematische Problem der Optionsbewertung Verzweigungsprozesse und stochastische Approximationsalgorithmen Mehr als 170 Übungsaufgaben ergänzen die Darstellung In der deutschsprachigen Literatur findet man kein vergleichbares Buch

Real Analysis Barry Simon, 2015-11-02 A Comprehensive Course in Analysis by Poincaré Prize winner Barry Simon is a five volume set that can serve as a graduate level analysis textbook with a lot of additional bonus information including hundreds of problems and numerous notes that extend the text and provide important historical background Depth and breadth of exposition make this set a valuable reference source for almost all areas of classical analysis Part 1 is devoted to real analysis From one point of view it presents the infinitesimal calculus of the twentieth century with the ultimate integral calculus measure theory and the ultimate

differential calculus distribution theory From another it shows the triumph of abstract spaces topological spaces Banach and Hilbert spaces measure spaces Riesz spaces Polish spaces locally convex spaces Frchet spaces Schwartz space and spaces Finally it is the study of big techniques including the Fourier series and transform dual spaces the Baire category fixed point theorems probability ideas and Hausdorff dimension Applications include the constructions of nowhere differentiable functions Brownian motion space filling curves solutions of the moment problem Haar measure and equilibrium measures in potential theory *Heat Kernel and Analysis on Manifolds* Alexander Grigoryan, 2009 This volume contains the expanded lecture notes of courses taught at the Emile Borel Centre of the Henri Poincaré Institute Paris In the book leading experts introduce recent research in their fields The unifying theme is the study of heat kernels in various situations using related geometric and analytic tools Topics include analysis of complex coefficient elliptic operators diffusions on fractals and on infinite dimensional groups heat kernel and isoperimetry on Riemannian manifolds heat kernels and infinite dimensional analysis diffusions and Sobolev type spaces on metric spaces quasi regular mappings and p Laplace operators heat kernel and spherical inversion on $SL(2, \mathbb{C})$ random walks and spectral geometry on crystal lattices isoperimetric and isocapacitary inequalities and generating function techniques for random walks on graphs Publisher's website

Rationality In An Uncertain World Nick Chater, Mike Oaksford, 2004-08-02 This book brings together an influential sequence of papers that argue for a radical re conceptualisation of the psychology of inference and of cognitive science more generally The papers demonstrate that the thesis that logic provides the basis of human inference is central to much cognitive science although the commitment to this view is often implicit They then note that almost all human inference is

uncertain whereas logic is the calculus of certain inference This mismatch means that logic is not the appropriate model for human thought Oaksford and Chater s argument draws on research in computer science artificial intelligence and philosophy of science in addition to experimental psychology The authors propose that probability theory the calculus of uncertain inference provides a more appropriate model for human thought They show how a probabilistic account can provide detailed explanations of experimental data on Wason s selection task which many have viewed as providing a paradigmatic demonstration of human irrationality Oaksford and Chater show that people s behaviour appears irrational only from a logical point of view whereas it is entirely rational from a probabilistic perspective The shift to a probabilistic framework for human inference has significant implications for the psychology of reasoning cognitive science more generally and for our picture of ourselves as rational agents
