Theoretical Probability

The **theoretical probability** of an event occurring is

$$\text{Theoretical probability} = \frac{\text{frequency of the event occurring}}{\text{total frequency of possible outcomes}}$$

Mutually exclusive events cannot happen at the same time.
For example, a fair die cannot land on a 3 and a 4 at the same time and a coin flip cannot land on heads and tails at the same time.

If an object (a coin, spinner, or dice for example) is described as **fair**, or **unbiased**, the theoretical probability of each outcome is the same; the theoretical probability of flipping a tails on a fair coin is $\frac{1}{2}$, the theoretical probability of rolling a 2 on a fair 6-sided dice is $\frac{1}{6}$.

   Problems and Solutions in Theoretical Statistics David Roxbee Cox,1978   *PROBLEMS AND SOLUTIONS IN THEORETICAL STATISTICS* David R. Cox,David V. Hinkley,1980   *Problems and Solutions in Theoretical Statistics* David Cox,1978-08-15 In our book Theoretical Statistics we gave about 150 Further results and exercises mostly intended to illustrate material of intrinsic interest that it was not possible to cover in the main text In many cases the statements were based quite directly on recent papers The present book gives outline solutions and discussion of these problems To make the book selfcontained we have preceded each set of problems by a brief summary of the main general ideas required The collection of these summaries provides a rapid review of the theory of statistics The book contains a substantial amount of general material not previously available in book form The detailed solution of special problems is a vital part of the study of any mathematical subject and we hope therefore that teachers and students of statistics especially at graduate level will find the problems and outline solutions helpful In addition we hope that research workers in statistics interested in special problems will find the book an effective review of some useful theoretical ideas including the associated elementary mathematical techniques While the numbering and arrangement of the problems is the same as in Theoretical Statistics we have rewritten a number of the problems partly in order to make them self contained and partly for clarification and correction   Problems and Solutions in Theoretical Statistics David Cox,D.
