Stalin and the Soviet Science Wars Ethan Pollock, 2008-11-23 Between 1945 and 1953 while the Soviet Union confronted postwar reconstruction and Cold War crises its unchallenged leader Joseph Stalin carved out time to study scientific disputes and dictate academic solutions He spearheaded a discussion of scientific Marxist Leninist philosophy edited reports on genetics and physiology adjudicated controversies about modern physics and wrote essays on linguistics and political economy Historians have been tempted to dismiss all this as the megalomaniacal ravings of a dying dictator But in *Stalin and the Soviet Science Wars* Ethan Pollock draws on thousands of previously unexplored archival documents to demonstrate that Stalin was in fact determined to show how scientific truth and Party doctrine reinforced one another Socialism was supposed to be scientific and science ideologically correct and Stalin ostensibly embodied the perfect symbiosis between power and knowledge Focusing on six major postwar debates in the Soviet scientific community this elegantly written book shows that Stalin's forays into scholarship can be understood only within the context of international tensions institutional conflicts and the growing uncertainty about the proper relationship between scientific knowledge and Party dictated truths The nature of Stalin's interventions makes clear that more was at stake than high politics these science wars were about asserting that the Party was rational and modern and about codifying the Soviet worldview in a battle for the hearts and minds of people around the globe during the early Cold War Ultimately however the effort to develop a scientific basis for Soviet ideology undermined the system's legitimacy Catalogue of the University of Michigan University of Michigan, 1895

Announcements for the following year included in some vols **Red Hamlet: The Life and Ideas of Alexander Bogdanov** James White, 2018-11-05 In this first full length biography of Alexander Bogdanov James D White traces the intellectual development of this key socialist thinker situating his ideas in the context of the Russian revolutionary movement He examines the part Bogdanov played in the origins of Bolshevism his role in the revolutions of 1905 and 1917 and his conflict with Lenin which lasted into Soviet times The book examines in some detail Bogdanov's intellectual legacy which though deliberately obscured and distorted by his adversaries was considerable and is of lasting significance Bogdanov was an

original and influential interpreter of Marx He had a mastery of many spheres of knowledge this expertise being employed in writing his chief theoretical work *Tectology* which anticipates modern systems theory See inside the book **A Short Course in Literature, English and American** John Seely Hart,1873 **The Present Age** ,1882 **The Johns Hopkins University Circular** ,1893 Includes University catalogues President s report Financial report registers announcement material etc *Catalogue* University of Michigan,1892 Announcements for the following year included in some vols **Mao and the Economic Stalinization of China, 1948-1953** Hua-Yu Li,2006-02-01 In the first systematic study of its kind Hua yu Li tackles one of the most important unresolved mysteries of the early history of the People s Republic of China_the economic policy shift of 1953 As a result of this policy shift the moderate economic policies of New Democracy were abruptly terminated_much sooner than specified by the official party line_and replaced with a radical Stalinist economic program called the general line for socialist transition Utilizing the rich archival materials released in China since the mid 1980s and Russian archival information released since the early 1990s Li presents a compelling explanation for the policy shift Placing the analysis within the larger context of the world communist movement communist ideology and Mao s complicated relationship with Stalin this book makes it clear that the policy shift was initiated by Mao and that he did so for two reasons First he was committed to a history text compiled under Stalin s guidance that purported to describe the Soviet experience of building socialism in the 1920s and 1930s Mao relied heavily on this text as a road map for China to follow in building socialism in the early 1950s Second Mao was driven by feelings of personal rivalry with Stalin and of national rivalry with the Soviet Union he wanted China to achieve socialism faster than the Soviet Union had The precise timing of the change Li argues resulted from Mao s belief that China was economically ready to build socialism and from his decision to interpret an ambiguous statement made by Stalin in October 1952 as a clear endorsement of a policy shift Li asserts that Mao was a committed Stalinist that he dominated domestic policy decision making and that he skillfully maneuvered his way through his negotiations with Stalin in advancing his own agenda Situating its analysis within the larger context of the world communist movement this carefully researched book will have a profound impact on the fields of communist studies and Sino Soviet relations and in studies of Mao Stalin and their relationship *Quarterly Report* Kansas.
