Entstehung von Verfassungen Ivan Baron Adamovich, Ivan Adamovich, 2004 Ivan Baron Adamovich wendet die moderne okonomische Theorie erstmals konsequent auf die Entstehung von Verfassungen in der Realitat an Dazu entwickelt er zunachst ein analytisches Raster fur die Untersuchung von Verfassungsgebungen Dieses wird dann auf die seit 1989 entstandenen Verfassungen in zehn Landern Mittel und Osteuropas angewendet Albanien Bulgarien Kroatien Mazedonien Polen Rumanien Slowakei Slowenien Tschechien und Ungarn Es zeigt sich dass Verfassungen nicht in einem interessen und institutionenleeren Raum entstehen Gute und wirksame Verfassungsregeln sind im Gegenteil weitgehend unbeabsichtigtes Ergebnis von Verhandlungen zwischen identifizierbaren eigeninteressierten Akteuren und nicht das Produkt von benevolenten Verfassungsgebern

Party Development and Democratic Change in Post-Communist Europe Paul G. Lewis, 2001 A range of countries are surveyed to throw light on these processes and broad

analysis conducted of the nature of conservatism in post communist Europe and the role of transnational party co operation in fostering processes of Europeanization Jacket The EU and its Relations with Eastern Europe de Deugd, Nienke, Hoen, Herman W., 2022-02-15 The politico economic relations between the European Union EU and Eastern Europe are currently entering a new phase which some scholars qualify as a revival of the Cold War This insightful book seeks to explain whether and why a Cold War Europe has returned and discusses underlying factors that clarify the relations between East and West since the Second World War **Währungskrisen in Mittel- und Osteuropa** Axel Brüggemann, 2000 □□□□□□, 2001-07

The Political Economy of Pension Reform in Central-Eastern Europe Katharina Müller, 1999 This work focuses on post 1989 social policy Existing public pension systems in Central Eastern European underwent fundamental change as Latin American style pension reforms were adopted The book focuses on the divergent pensions reform experiences of Poland Hungary and the Czech Republic *China's State-Directed Economy and the International Order* Luyao Che, 2019-03-14 This book explores the legal implications of China's state directed economic model for the existing international economic order It first reveals the close links between the market and the state in contemporary China by profiling an emerging triple role of the state in the economy It then explores how the domestic legal system underpins the distinctive market state relationship before analysing whether essential norms of international economic law which bracket the international economic order are able to adapt to China's innovative market state relationship The book argues that the international economic order is inherently limited since it tends to adhere to an orthodox dichotomy with a clear boundary between the market and the state It also suggests that China's new state market relationship has challenged the dichotomy the state does not intend to eliminate the functioning of the market but conversely utilises a market mechanism and makes itself more integrated into the market Lastly the book proposes a fresh perspective to comprehend the market state question which does not take for granted that all market state relationships are mutually exclusive Journal of World Trade, 2001-08

Remaking Europe Jozef M. van Brabant, 1999 The 1996 1997 Intergovernmental Conference and a clearer road to monetary union have paved the way for the start of negotiations for accession to the European Union EU of up to ten transition economies A major watershed in efforts to integrate Europe the plans to widen the EU will inevitably conflict with forces for deepening integration Accession negotiations will be complex acrimonious and protracted their outcome in terms of the quality of accession are currently unforeseeable Focusing especially on economic factors this timely volume explores the key questions of widening why the negotiations are likely to be cumbersome and contentious for all concerned why the evolving relationship between the EU and its eastern neighbors has been less than smooth and why considerable asymmetries exist among countries and over time in the distribution of the gains and losses for existing and new members alike **The Best Books for Academic Libraries: Social sciences**, 2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers *Postcommunist Transformation and the Social*

Sciences Frank Bönker, Klaus Müller, Andreas Pickel, 2002-06-03 The work's major substantive themes revolve around problems of post communist socio economic transformations Specifically it explores post communist systemic change the role of religion and collective identity the significance of trust and economic culture patterns of state economy interactions in enterprise restructuring the context of EU expansion the strengths and weaknesses of economic theory and neo liberal doctrine and the history of ideas in the post communist transformation debate □□□□□, 2001 **Czech Republic** Vladka Edmondson, David Short, 1999 Most entries of this revised edition are new as so much has been recently published on Czech affairs All aspects of the country are covered in selective critical annotations of pre eminently English language publications making this an invaluable reference work for scholars students and the general reader alike **Globalization and Regionalization in Post-Socialist Economies** John Pickles, 2008-10-24 Globalization and Regionalization in Post Socialist Economies explores the reconfiguration of economic spaces in the new Europe with a focus on the post socialist economies of Central and Eastern Europe and the former Soviet Union It is made up of an interdisciplinary collection of essays by leading scholars and brings together new perspectives on the economic transformations in post socialist countries as they struggle with the development of market mechanisms The World Trade Organization (WTO) and the Accession Process Anna Lanoszka, 2001 *Poverty, Urbanity and Social Policy* Jolanta Aldukaite, 2009 The aim of this book is to provide the reader with the broad spectrum of poverty and social policy issues in Central and Eastern Europe and address the most urgent topics of welfare state research namely poverty children and social policy gender social policy and poverty urban policy renewal and poverty and overall challenges to social policy reform The book demonstrates that despite an increase in poverty and inequalities in many Central and Eastern European countries during the last 18 years the social policy systems have not experienced a radical dismantlement throughout the entire region The post Communist welfare state still shows more comprehensive solutions to social problems than residual ones Nevertheless the deteriorated fiscal capacities of the state in some cases hinder the successful poverty solutions as well as the expansion of the welfare programmes Yet the Central and Eastern European region is very diverse regarding the scope and depth of social problems encountered and some countries have implemented more successful policy solutions than other ones Furthermore the findings of this volume demonstrate that Central and Eastern European countries are not so dramatically distinct from Western Europe neither in their social problems encountered nor in their solutions Nevertheless the experience of the socialist regime the relatively lower wages and lower social benefits as well as the higher share of GDP produced in a shadow economy allow the CEE countries to group into the distinct post Communist regime **Bibliographie der Wirtschaftswissenschaften** , 1998 *Bibliographie der Staats-und Wirtschaftswissenschaften* , 1998
