Peripheries Syntactic Edges And Their Effects:

Peripheries David Adger, Cécile de Cat, George Tsoulas, 2006-01-14 The syntactic periphery has become one of the most important areas of research in syntactic theory in recent years due to the emergence of new research programmes initiated by Rizzi Kayne and Chomsky However research has concentrated on the empirical nature of clausal peripheries The purpose of this volume is to explore the question of whether the notion of periphery has any real theoretical bite An important consensus emerging from the volume is that the edges of certain syntactic expressions appear to be the locus of the connection between phrase structure prosody and information structure This volume contains 16 papers by researchers in this area The book contains an extensive introduction setting out the research questions addressed and setting the contributions in an overall theoretical context has a distinct comparative slant brings together work from a range of theoretical perspectives while maintaining a unity of purpose could serve as the basis for a graduate course on peripheral positions contains papers addressing the question of the fine grainedness of syntactic representations the relevance of syntactic edges to locality and semantic interpretation the nature of the dependencies connecting peripheral elements to the syntactic core Audience Academics and graduate students interested in syntax and its interfaces with semantics and prosody acquisition of syntax cross linguistic comparison

Adverbial Clauses, Main Clause Phenomena, and Composition of the Left Periphery Liliane Haegeman, 2012-11-08 Uses the cartographic theory to examine the left periphery of the English clause and compare it to the left peripheral structures of other languages

Die Syntax der Satzkomplementierung Jiro Inaba, 2014-06-02 In theoretischen Arbeiten zur Syntax des Deutschen hat der rechte Satzrand bisher wenig Aufmerksamkeit gefunden Die vorliegende Studie versucht diese Lücke zu schließen Im Mittelpunkt stehen dabei die Stellungseigenschaften satzwertiger Ergänzungen die im Deutschen im Gegensatz zu anderen Komplementen postverbal erscheinen Inaba zeigt dass die Nachfeldbesetzung nicht als uniformer Prozess zu analysieren ist Er argumentiert dafür dass Satzkomplemente in postverbaler Position basisgeneriert werden während die Endstellung von Relativsätzen als das Resultat einer phonologischen Umstellung betrachtet wird Dies ermöglicht eine adäquate Analyse von Problemfeldern der deutschen Syntax wie der dritten Konstruktion und dem langen Passiv Die Sonderstellung von Satzkomplementen die in vielen OV Sprachen postverbal erscheinen wird auf die Wirkungsweise der Mechanismen zur Verankerung der hierarchischen syntaktischen Strukturen auf lineare Abfolgen abbilden

Mapping the Left Periphery Paola Beninca, Nicola Munaro, 2011-02-16 Mapping the Left Periphery the fifth volume in The Cartography of Syntactic Structures is entirely devoted to the functional articulation of the so called complementizer system the highest part of sentence structure The papers collected here identify on the basis of substantial empirical evidence new atoms of functional structure which encode specific features that are typically expressed in the left periphery The volume also submits the richly articulated CP structure to further crosslinguistic checking The research presented here has led to the identification of new important restrictions in the relative sequence of elements appearing in

the left periphery With contributions from African languages Chinese Hungarian Romance languages and Italian dialects Mapping the Left Periphery will be of interest to syntacticians working on comparative syntax and more specifically on Romance grammar

The Clause Structure of Wolof Harold Torrence, 2013-01-29 This volume investigates the clausal syntax of Wolof an understudied Atlantic language of Senegal The goals of the work are descriptive analytical and comparative with a focus on the structure of the left periphery and left peripheral phenomena The book includes detailed examination of the morpho syntax of wh questions successive cyclicity subject marking relative clauses topic focus articulation and complementizer agreement Novel data from Wolof is used to evaluate and extend theoretical proposals concerning the structure of the Complementizer Phrase CP and Tense Phrase TP It is argued that Wolof provides evidence for the promotion analysis of relative clauses an exploded CP and TP and for analyses that treat relative clauses as composed of a determiner with a CP complement It is further argued that Wolof has a set of silent wh expressions and these are compared to superficially similar constructions in colloquial German Bavarian Dutch and Norwegian The book also presents a comparison of complementizer agreement across a number of related and unrelated languages Data from Indo European Germanic varieties French Irish Niger Congo Atlantic Bantu Gur and Semitic Arabic languages put the Wolof phenomena in a larger typological context by showing the range of variation in complementizer agreement systems

Event Structure and the Left Periphery Katalin É. Kiss, 2007-11-07 Katalin Kiss of the Hungarian Academy of Sciences in Budapest has brought together in this volume substantial new results in a novel field of research The text analyzes the syntactic and semantic consequences of event structure The studies contained in this volume test the hypothesis that event structure correlates with a number of things including word order the presence or absence of the verbal particle and the specific feature of the internal argument

Annual Workshop on Formal Approaches to Slavic Linguistics Andrei Antonenko, John F. Bailyn, Christina Yurkiw Bethin, 2008

Annual Workshop on Formal Approaches to Slavic Linguistics, 2008

Studies in Formal Slavic Phonology, Morphology, Syntax, Semantics and Information Structure Gerhild Zybatow, 2009 The proceedings of FDSL 7 Leipzig 2007 offer current formal investigations into Slavic morphology semantics syntax and information structure In addition to the main conference FDSL 7 saw the first special Workshop on Slavic Phonology initiated by Tobias Scheer Some of the papers presented at that workshop are included in this volume as well The analyses published in this volume address the following Slavic languages Bulgarian Czech Macedonian Old Church Slavonic Polish Russian Serbian and Serbo Croatian FDSL the European forum for the formal description of Slavic languages was called into being in 1995 The FDSL conferences take place biannually in Leipzig and Potsdam

Selected Papers from the 2006 Cyprus Syntaxfest Kleanthes K. Grohmann, Phoebos Panagiotidis, 2009 This volume presents a selection of contributions from the week long Cyprus Syntaxfest in 2006 which brought together research in syntax by several respected and prolific theoretical linguists from all over the world During the six days of the Syntaxfest work from a variety of

viewpoints in modern generative grammar was presented and the research discussed and debated followed diverse methodological paths with the thematic focus on left peripheries in linguistic structures and their interface interpretation. The current collection of expanded versions of selected research presented at the Cyprus Syntaxfest reflects a wide variety of approaches to these topics; it also provides a glimpse of the rich sample of cross linguistic data that informed the discussions of syntactic peripheries and their interface interpretation. It offers eleven studies on clausal and nominal left peripheral phenomena and their role in interpretation in a variety of typologically unrelated languages. More significantly, the contributions collected here underscore the by now established importance and theoretical interest of studying the edge of constituents, whether phasal or not. In every chapter, the blueprint of a general interpretive hierarchy driving and constraining syntax is also retraced throughout.

Linguistic Derivations and Filtering Hans Broekhuis, Ralf Vogel, 2013. This volume focuses on the role of the postulated derivational and filtering devices in current linguistic theory and aims to promote the exchange of ideas between the proponents of MP and OT in order to evaluate the role of these devices in the two frameworks. It sheds more light on the tenability of the often proclaimed opinion that MP and OT are incompatible frameworks given that the explanatory power of the former mainly resides on the generative device whereas the explanatory power of the latter mainly resides in the filtering device. Papers from various perspectives discuss and compare the two devices in the two frameworks. The volume thus collects a large number of the arguments in favour of more a strictly derivational approach, a more strictly filtering approach or a more hybrid approach. The book will be of interest to any researcher or advanced student in Linguistic Theory. It is more specifically directed to syntacticians working within the current frameworks that have developed from Chomsky's minimalist program, MP and Prince and Smolensky's Optimality Theory, OT.
