Political Confidence and Democracy in Europe Christian Schnadt, 2018-07-09. This book examines the antecedents and consequences of citizens' confidence in different political institutions and authorities. Its main argument states that a distinction between confidence in representative and regulative institutions and authorities is of crucial importance in order to gain novel insights into the relevance of political confidence for the viability of democratic systems. Relying on individual level data from the European Social Survey (ESS), the author provides empirical evidence that citizens from a total of twenty-one European countries make a distinction between confidence in representative institutions and authorities and confidence in regulative institutions and authorities. Furthermore, the author shows that both types of political confidence emanate from different sources and are associated with varying consequences. Overall, these findings indicate that confidence in representative and confidence in regulative institutions and authorities establish two qualitatively different types of political confidence, each with distinct implications for the functioning and well-being of modern democracies.

Theories of the Policy Process Christopher M. Weible, Paul A. Sabatier, 2018-05-15. Theories of the Policy Process provides a forum for the experts in the most established and widely used theoretical frameworks in policy process research to present the basic propositions, empirical evidence, latest updates, and the promising future research opportunities of each framework. This well-regarded volume covers such enduring classics as Multiple Streams, Zahariadis et al. Punctuated Equilibrium, Jones et al. Advocacy Coalition Framework, Jenkins-Smith et al. Institutional Analysis and Development Framework, Schlager and Cox, and Policy Diffusion, Berry and Berry, as well as two newer theories: Policy Feedback, Mettler, and SoRelle, and Narrative Policy Framework, McBeth et al. The fourth edition now includes a discussion of global and comparative perspectives in each theoretical chapter and a brand new chapter that explores how these theories have been adapted for and employed in non-American and non-Western contexts. An expanded introduction and revised conclusion fully examine and contextualize the history, trajectories, and functions of public policy research. Since its first publication in 1999, Theories of the Policy Process has been and remains the quintessential gateway to the field of policy process research for students, scholars, and practitioners.

Citizenship in Contemporary Europe Michael Lister,2008-05-12 This book seeks to analyse the impact of globalisation European integration mass migration changing patterns of political participation and welfare state provision upon citizenship in Europe Uniting theory with empirical examples the central theme of the book is that how we view such changes is dependent upon how we view citizenship theoretically The authors analyse the three main theoretical approaches to citizenship 1 classical positions liberal communitarian and republican primarily concerned with questions of rights and responsibilities 2 multiculturalist and feminist theories concerned with the question of difference and 3 postnational or cosmopolitan theories which emphasise how citizen rights and behaviours are increasingly located beyond the nation state Using these theoretical perspectives the second section of the book assesses four key social economic and political developments which pose challenges for citizenship in Europe migration political participation the w

Bennich-Björkman,2007-12-15 Are world views once formed during childhood and adolescence stable over life or do they change when they come under pressure from new institutional contexts This book seeks the answer by re visiting an aged political generation growing up in historically unique interwar Estonia but living their adult lives in exile in Canada and Sweden or under foreign occupation in the then Soviet Estonia Some major conclusions drawn are that of dominant cultural themes being stable over time in all three groups while cultural correspondence between country of origin and host society plays an essential role in explaining why the exile communities differ in their degree of genuine democratic citizenship
