The portable Van Gogh Vincent van Gogh, 2002 The Portable Van Gogh , 2008-09-09 Vincent van Gogh's paintings and his tempestuous life story continue to command enormous popular interest inspiring numerous blockbuster exhibitions and biographies This compact collection returns to what started it all the paintings themselves With a hand held size this volume manages to be affordable and comprehensive a veritable dictionary of the artist's work Included are all genres and periods of his work from his gorgeous irises to his striking night skies and portraiture Introducing the paintings is an intriguing essay by celebrated art critic Robert Hughes This book provides an essential resource for students as well as for all art lovers And it represents an extraordinary value No other book on the artist offers as many images at this price **The New Psychedelic Revolution** James Oroc, 2018-01-16 A bold exploration of modern psychedelic culture its history and future Examines 3 modern psy culture architects chemist Alexander Sasha Shulgin mycologist philosopher Terence McKenna and visionary artist Alex Grey Investigates the use of microdosing in extreme sports the psy trance festival experience and the relationship between the ego entheogens and toxicity Presents a History of Visionary Art from its roots in prehistory to Ernst Fuchs and the Vienna School of the Fantastic to contemporary psychedelic art After the dismantling of a major acid laboratory in 2001 dramatically reduced the world supply of LSD the psychedelic revolution of the 1960s appeared to have finally run its course But the opposite has actually proven to be true and a psychedelic renaissance is rapidly emerging with the rise in popularity of transformational festivals like Burning Man and BOOM the return to positive media coverage of the potential benefits of entheogens and the growing number of celebrities willing to admit the benefits of their own personal use Along with the return of university research the revival of psychedelic philosophy and the increasing popularity of visionary art these new developments signify the beginning of a worldwide psychedelic cultural revolution more integrated into the mainstream than the counterculture uprising of the 1960s In his latest book James Oroc defines the borders of 21st century psychedelic culture through the influence of its three main architects chemist Alexander Shulgin mycologist Terence McKenna and visionary artist Alex Grey before illustrating a number of facets of this Second Psychedelic Revolution including the use of microdosing in extreme sports the tech savvy psychedelic community that has arisen around transformational festivals and the relationship between the ego entheogens and toxicity This volume also presents for the first time a History of Visionary Art that explains its importance to the emergence of visionary culture Exploring the practical role of entheogens in our selfish and fast paced modern world the author explains how psychedelics are powerful tools to examine the ego and the shadow via the transpersonal experience Asserting that a cultural adoption of the entheogenic perspective is the best chance that our society has to survive he then proposes that our ongoing psychedelic revolution now a century old since the first synthesis of a psychedelic in 1918 offers the potential for the birth of a new Visionary Age

Vincent Van Gogh Stuart Morris,2008 VINCENT VAN GOGH Few artists command such fervent
devotion amongst art lovers and such high prices in the salerooms of the art world Love him or hate him Vincent van Gogh is
one of a handful of artists who is now a cultural event Stuart Morris's study concentrates on the paintings first and employs
van Gogh's eloquent letters as an aesthetic reference point Much of the book is concerned with metacriticism the way van
Gogh has been critically received over the years Vincent van Gogh is one of the most celebrated of painters It's a bit of a
mystery The mystery or irony is that his paintings have commanded the highest prices in the auction rooms of the

contemporary art world 88 million dollars 53 million dollars and so on yet he only managed to sell one painting during his lifetime and he lived in poverty with financial support from his brother Theo Why is Vincent van Gogh so popular His legend has developed relatively rapidly His art is loved by the critics and public The crazy prices paid for single oil paintings are the manifestations of the fervour that van Gogh seems to generate He is one of the handful of painters who cause great excitement every time exhibitions of his work are put on One thinks also of Claude Monet Leonardo da Vinci Michelangelo Buonaroti and Pablo Picasso These are artists that the public go mad for so that when they are exhibited there are huge queues trailing around the block The 1990 centenary celebrations of poor Vincent showed how much he is exalted There were films about him discussions and conferences TV documentaries magazine articles reviews letters and much merchandize was sold to the great glee of the manufacturers posters tea towels calendars mugs souvenirs of all kinds What would the dishevelled obsessive man who painted those small canvases in the years up to 1890 in Southern France make of the amazing fuss that now surrounds his work What would van Gogh think of just one of his paintings being bought for 88 million dollars It is a huge sum even in today s expensive world You could build a hospital or two with the money Imagine it Did Vincent know that when he painted those blue irises on that small standard size canvas that it would one day be worth millions of dollars I shall count myself very happy if I can manage to work enough to earn my living for it worries me a lot when I think that I have done so many pictures and drawings without ever selling one Like the workers he depicted in numerous images Vincent van Gogh himself worked very hard to improve his art With a dogged determination van Gogh copied the Old Masters as well as Japanese prints His determined self education and self improvement paid off resulting in more than 800 paintings in about 8 years The years of van Gogh s art are relatively few nearly all of the important works were made in the decade 1880 90 Hence his paintings are credited in art history books with the month and sometimes the day as well as the year of production For most artists 1889 would suffice For van Gogh the credit is October 1889 Producing 800 paintings in 8 years is an average of a hundred per year or one every three and a half days More likely van Gogh would have worked on a number at the same time or within a short space of time
