Perception Knowledge And Disbelief A Study Of Jayarasi Sceptism:

Advaita Epistemology and Metaphysics Chakravarthi Ram-Prasad, 2013-11-05 Based on original translations of passages from the works of three major thinkers of the classical Indian school of Advaita Sankara Vacaspati and Sri Harsa but addressing issues found in Descartes Berkeley Hume Kant Wittgenstein and contemporary analytic philosophers this book argues for a philosophical position it calls non realism This is the view that an independent external world must be assumed if the features of cognition are to be explained but that it cannot be proved that there is such a world independently of an appeal to cognition itself This position is constructed against idealist denials of externality realist arguments for an independent world and the sceptical denial of the coherence of cognition

A Historical-developmental Study of Classical Indian Philosophy of Morals Rajendra Prasad, 2009 Contributed articles

Perception, Knowledge and Disbelief Eli Franco, 1994 The Tattvapaplavasimha is a philosophical text unique of its kind it is the only text of the Carvaka Lokayata school which has survived and the only Sanskrit work in which full fledged scepticism is propounded Notwithstanding that it has been hitherto almost completely ignored The present book consists of an introduction detailed analysis edition translation with extensive notes of the first half of the text In the introduction Jayarasi's affiliation to the Lokayata school is reassessed and his place in the historical development of Indian Philosophy evaluated New evidence for the dating of Jayarasi is examined and a new dating is suggested

Skepticism and the Veil of Perception Michael Huemer, 2001-07-17 Since Descartes one of the central questions of Western philosophy has been that of how we know that the objects we seem to perceive are real Philosophical skeptics claim that we know no such thing Representationalists claim that we can gain such knowledge only by inference by showing that the hypothesis of a real world is the best explanation for the kind of sensations and mental images we experience Both accept the doctrine of a veil of perception that perception can only give us direct awareness of images or representations of objects not the external objects themselves In contrast Huemer develops a theory of perceptual awareness in which perception gives us direct awareness of real objects not mental representations and we have non inferential knowledge of the properties of these objects Further Huemer confronts the four main arguments for philosophical skepticism showing that they are powerless against this kind of theory of perceptual knowledge

Skepticism and the Veil of Perception Michael Huemer, 2001 In opposition to both skeptics and representationalists Huemer philosophy U of Colorado Boulder presents a theory of perceptual awareness according to which perception gives us direct awareness of real objects and non inferential knowledge of the properties of these objects He responds to the major arguments for skepticism including the infinite regress argument the problem of the criterion the brain in the vat and the impossibility of verification

Skepticism and the Definition of Knowledge Gilbert Harman, 2015-06-05 Originally published in 1990 This study argues that scepticism is an intelligible view and that the issue scepticism raises is whether or not certain sceptical hypotheses are as plausible as the ordinary views we accept It discusses

psychological concepts definitions of knowledge belief and hypothetic inference inference to the best explanation Starting from Is skepticism a problem for epistemology the book takes us through the argument for the possibility of scepticism including looking at sense data and considering memory and perception **Scepticism and Perceptual Justification**

Dylan Dodd, Elia Zardini, 2014-05-01 One of the hardest problems in the history of Western philosophy has been to explain whether and how experience can provide knowledge or even justification for belief about the objective world outside the experiencer's mind A prominent brand of scepticism has precisely denied that experience can provide such knowledge How for instance these sceptics ask can I know that my experiences are not produced in me by a powerful demon or in a modern twist on that traditional Cartesian scenario by a supercomputer This volume originating from the research project on Basic Knowledge recently concluded at the Northern Institute of Philosophy presents new essays on scepticism about the senses written by some of the most prominent contemporary epistemologists They approach the sceptical challenge by discussing such topics as the conditions for perceptual justification the existence of a non evidential kind of warrant and the extent of one's evidence the epistemology of inference the relations between justification probability and certainty the relevance of subjective appearances to the epistemology of perception the role that broadly pragmatic considerations play in epistemic justification the contents of perception and the function of attention In all these cases the papers show how philosophical progress on foundational issues can improve our understanding of and possibly afford a solution to a historically prominent problem like scepticism Greek Skepticism Charlotte L. Stough, 2023-11-10

Greek Skepticism examines the evolution of skeptical philosophy in ancient Greece focusing on epistemological concerns such as knowledge belief and perception while framing these inquiries within the Hellenistic era's broader philosophical challenges The study views skepticism not as a static doctrine but as a dynamic response to recurring questions about human understanding Divided into four sections early Pyrrhonists Academic Sceptics Aenesidemus and Sextus Empiricus it traces skepticism's progression over six centuries Early Pyrrhonists like Pyrrho emphasized achieving mental tranquility ataraxia through the suspension of judgment seeing philosophy as a practical guide to life Academic Sceptics led by figures such as Arcesilaus and Carneades advanced skepticism by engaging in dialectical arguments to challenge certainty particularly targeting Stoic doctrines Their critiques expanded the skeptical framework linking it to practical ethics and intellectual rigor Later developments by figures like Aenesidemus and Sextus Empiricus further refined skepticism's scope Aenesidemus while enigmatic and associated with Heraclitean ideas contributed critical arguments that revived Pyrrhonism during his era Sextus Empiricus the last significant skeptic integrated skepticism with empirical medicine positioning skepticism as a remedy for philosophical dogmatism His detailed critiques of rival philosophies provide a rich source for understanding Greek skepticism's epistemological depth Through Sextus pragmatic approach skepticism emerged as both a philosophical method and a practical way of life influencing subsequent thought and offering enduring insights into the complexities of knowledge and belief This title is part
