Percutaneous Transluminal Angioscopy

National Library of Medicine (U.S.)

Percutaneous Transluminal Angioscopy:

Percutaneous Transluminal Angioscopy Andreas Beck, 2012-12-06 Percutaneous transluminal angioscopy is opening up exciting possibilities for the interventional radiologist since it can picture vascular features with an accuracy and clarity that previously has not been possible Dr Beck paves the way for the use of this new tool in clinical diagnosis he details the technical prerequisites gives step by step instructions for applying the technique and discusses how to interpret the resulting images The amazing results of percutaneous angioscopy are compared with the results of conventional angioscopy This approach introduces the new and unknown in perspective with the tried and trusted of the past Major advantages become obvious unclear or uncertain angiographical findings can be cleared up interventional procedures can be supported and the effects of interventional radiology can be seen before and after vascular treatment The author's unique insight and systematic approach to the vascular system make this atlas a truly pioneering work *Percutaneous Transluminal*

Angioscopy Andreas Beck, E. Zeitler, W. Wenz, 1993-03-26 **Radiology of Peripheral Vascular Diseases** E.

Zeitler, 2012-12-06 Over the last decade important advances have been made in the radiological management of peripheral vascular diseases In the diagnostic field the role of conventional angiography has diminished considerably in favor of new non invasive diagnostic modalities such as color Doppler imaging and magnetic resonance angiography Percutaneous radiological treatment of arterial diseases of the limbs has revolutionized therapeutic concepts in this area Professor E Zeitler is a renowned international expert in the field of peripheral He was one of the pioneers in investigating and developing per vascular diseases cutaneous catheter treatment of arterial stenosis of peripheral arteries This volume is based upon his unique lifetime's experience of treating patients presenting with peripheral vascular diseases Moreover Professor Zeitler was very successful in engaging a group of excellent authors all specialists in their field to contribute individual chapters Together they have succeeded in producing one of the most comprehensive books on the modern radiological approach to patients with peripheral vascular diseases It is my firm belief that this volume will be of great interest to radiologists angiologists and vascular surgeons alike by providing them with the latest knowledge and information in the field of radiology I wish this volume the same success as the many other volumes already published in the book series
