Smith,2022-12-26 Correctional officers face considerable stress risk and danger that lead to poor physical and mental health outcomes In fact their life expectancy is 15 years shorter than the national average Public perception and media portrayals of correctional officers tend to reinforce stereotypes of brutish improper and uncontrolled behavior Yet the reality is that correctional officers are operating a default public and mental health system for a sizeable portion of our society a responsibility that exposes them to considerable risk These negative effects have been compounded by an international staffing crisis that has made our jails and prisons far less safe for working officers To address this situation this book features an examination of a combined 11 313 correctional officers and 42 of their family members in the United States
