Football in Neo-Liberal Times Peter Kennedy, David Kennedy, 2016-02-05 This book offers an original Marxist critique of the European football business It argues that the Marxist account of the difference between profits and surplus value is crucial to an understanding of the fluid and contradictory nature of the commodification of football Section one analyses the nature of modern professional football and section two highlights attempts via government agency and football clubs to corral fans into ever greater identification with business logic aimed at breaking traditional social relations Section three draws on a number of cases studies across Europe to analyse how some fans are attempting to mount a counter ideological response to the assault of neo liberalism on the game
