Digital Punishment Sarah Esther Lageson,2020-05-27 The proliferation of data driven criminal justice operations creates millions of criminal records each year in the United States Documenting everything from a police stop to a prison sentence these records take on a digital life of their own as they are collected by law enforcement and courts posted on government websites re posted on social media online news and mugshot galleries and bought and sold by data brokers The result is digital punishment where mere suspicion or a brush with the law can have lasting consequences In Digital Punishment Sarah Esther Lageson unpacks criminal recordkeeping in the digital age as busy and overburdened criminal justice agencies turned to technological solutions offered by IT companies over the last two decades These operations produce a mountain of data including the names photographs and home addresses of people arrested or charged with a crime transforming millions of paper records into a digital commodity Regardless of factual or legal guilt these records rapidly multiply across the private sector background checking and personal data industries Emboldened by public records laws designed for paper based systems criminal record data has become an extremely valuable resource for employers landlords and communities to monitor criminal behavior and assess other people But while transparency laws were originally designed to allow governmental watchdogging digital punishment has redirected our gaze toward one another Hundreds of interviews detailed in this book reveal the consequences of digital punishment as people purposefully opt out of society to cope with privacy and due process violations As criminal histories impact nearly every aspect of private and civic life the collateral consequences of even the most minor records are much more than barriers to employment and housing For the criminal record holder the messy entanglement of government bureaucracy is nothing compared to the jurisdiction less haze of the internet Drawing on empirical data interviews and review of case law this book powerfully demonstrates that addressing digital punishment will require a direct acknowledgement of privacy and dignity in the context of public accusation and a reckoning of how rehabilitation can actually occur in a society that never forgets **Socio-Technical Aspects in Security and Trust** Thomas Groß,Luca Viganò,2021-06-21 This book constitutes the refereed post conference proceedings of the 10th International Workshop on Socio Technical Aspects in Security and Trust STAST 2020 held as a virtual event in September 2020 The 8 full papers and 3 short papers presented in this volume were carefully reviewed and selected from 42 submissions and are organized in the following topical sections personality and behavior behavior in face of adversaries smart environments decentralized systems and digital ledgers and reflections on socio technical aspects of security The Chapter Statistical Reliability of 10 Years of Cyber Security User Studies is available open access under a Creative Commons Attribution 4 0 International License via link springer com **Educational News** Albert Newton Raub,1891 **Intelligent Computing** Kohei Arai,2023-08-31 This book is a collection of insightful and unique state of the art papers presented at the Computing Conference which took place in London on June 22 23 2023 A total of 539 papers
