China's Electric Vehicle Industry Yingqi Liu, 2025-09-01 Innovation and Development of China's New Energy Vehicles Industry provides comprehensive insights into the role of new energy vehicles in facilitating the global energy transition. The book aims to foster an understanding of how these vehicles contribute to the shift towards green energy. Drawing from extensive data collected from over 20 cities, 40 companies, and more than 500 questionnaires, the book offers practical information for policymakers and industry stakeholders. Beyond the technological aspects such as battery technology, electric drive systems, and charging infrastructure, the book also discusses policy support mechanisms, financial subsidies, tax incentives, and regulatory frameworks. It includes international case studies from the USA and UK, aiding readers in grasping the global dynamics and fostering international cooperation. The book is essential for understanding the interplay between new energy vehicles and energy transition, providing actionable insights for industry professionals, researchers, and policymakers. Presents comprehensive insights into the current Chinese approach to the new energy vehicle industry. Highlights technological innovation as the core driving factor in business model innovation, aligning with the rapidly evolving nature of new energy vehicles and their reliance on technological breakthroughs in battery systems, energy storage, and charging infrastructure. Includes case study comparisons to new energy vehicle industry development in other countries and in global policy development.

Business Model Pioneers Kai-Ingo Voigt, Oana Buliga, Kathrin Michl, 2016-07-28 Business model innovations are conceived and implemented by a special type of entrepreneur: business model pioneers. This book presents 14 compelling case studies of business model pioneers and their companies who have successfully introduced new business ideas to the market. The examples range from industries such as retail, media, and entertainment to services and industrial projects. For each example, the book provides information on the market environment at the time of launch and illustrates the driving forces behind these business models. Moreover, current market developments are highlighted and linked to the evolution of the business models. Lastly, the authors present the profile of a typical business model pioneer.

Business & Society O.C. Ferrell, Debbie M. Thorne, Linda Ferrell, 2024-06-04 Formerly published by Chicago Business Press, now published by Sage Business Society, integrates business and society into organizational strategies to showcase social responsibility as an actionable and practical field of interest grounded in sound theory. Mutum, Soo Yeong Ewe, Ezlika M. Ghazali, Racheal Louis Vincent, 2024-04-01

There is an increasing interest in emerging markets because of the higher economic growth rates compared to developed economies However these markets have a diverse consumer base with unique needs and preferences As a result companies in these markets face different challenges and opportunities

Unfortunately there is a lack of marketing cases from these markets This book presents actual real world marketing cases in these markets offering an in depth look at some of the issues faced by companies in different industries It is hoped that the cases would serve as valuable reference material for academics students professionals in marketing business strategy and other related fields as well as policymakers to better understand the challenges of these markets and develop strategies to succeed in them **A History of Energy Flows** Anthony N. Penna, 2019-09-18

This book presents a global and historical perspective of energy flows during the last millennium The search for sustainable energy is a key issue dominating today's energy regime This book details the historical evolution of energy following the overlapping and slow flowing transitions from one regime to another In doing so it seeks to provide insight into future energy transitions and the means of utilizing sustainable energy sources to reduce humanity's fossil fuel footprint The book begins with an examination of the earliest and most basic forms of energy use namely that of humans metabolizing food in order to work with the first transition following

the domestication and breeding of horses and other animals The book also examines energy sources key to development during the industrialization and mechanization such as wood and coal as well as more recent sources such as crude oil and nuclear energy The book then assesses energy flows that are at the forefront of sustainability by examining green sources such as solar wind power and hydropower While it is easy to see energy flows in terms of revolutions transitions have taken centuries to evolve and transitions are never fully global as for example wood remains the primary fuel source for cooking in much of the developing world This book not only demonstrates the longevity of energy transitions but also discusses the possibility for reducing transition times when technological developments provide inexpensive and safe energy sources that can reduce the dependency on fossil fuels This book will be of great interest to students and scholars of energy transitions sustainable energy and environmental and energy history
