*Vaccines and Therapeutics Utilizing New Adjuvants and Potential Inhibitors to Target Emerging Infectious Diseases* Jia Kim, Ousman Jobe, Mara Jana Broadhurst, 2025-12-01 Emerging infectious diseases such as persistent infectious diseases that have not been controlled i.e. HIV, dengue fever, those increasing in incidence i.e. flaviviruses, food and waterborne pathogens or previously unknown diseases have impacted populations throughout the world. These diseases require either preventative vaccines or proper therapeutics to mitigate global epidemics from emerging. Recent vaccine and therapeutic candidates have emerged and are moderately successful; however, there is still room for improvement with either long-lasting vaccine efficacy or therapeutics with maximal efficacy and minimal toxicity. New technologies are necessary for both preventative vaccines and therapeutics for emerging infectious diseases. As these diseases impact populations on a global scale, preventing infection is key. However, when that is not feasible, treatment strategies and specific therapeutics with minimal toxicity and side effects are just as critical in fighting such epidemics. This Research Topic aims to cover current and emerging technologies being explored to prevent or treat infectious diseases, including strategies currently in preclinical or clinical phase studies. We aim to bring together all aspects of research and development of these new technologies and invite vaccinologists, immunologists, pharmacologists, and other multidisciplinary groups to feed knowledge into these growing fields. This research will impact the current landscape of infectious diseases and may also provide interventions against future pandemics. We welcome the submission of Review and Original Research articles focusing on preclinical and clinical vaccines or therapeutic studies and Perspective and Opinion articles highlighting the gaps in vaccines and therapeutics targeting emerging infectious diseases, including viral or bacterial infections as well as multidrug-resistant bacteria. Articles may focus on but are not limited to the following subtopics: Promising adjuvants in preclinical and clinical vaccine trials; Promising inhibitors that target infectious diseases in preclinical studies; Mechanism of action of novel inhibitors or adjuvants; Formulations that target different sites of action i.e. mucosal regions. *Current and Emerging Technologies for the Diagnosis of Microbial Infections*, 2015-11-23. *Current and Emerging Technologies in Microbial Diagnostics*, the latest volume in the *Methods in Microbiology* series, provides comprehensive cutting-edge reviews of current and emerging technologies in the field of clinical microbiology. The book features a wide variety of state-of-the-art methods and techniques for the diagnosis and management of microbial infections, with chapters authored by internationally renowned experts. This volume focuses on current techniques such as MALDI-TOF mass spectrometry and molecular diagnostics, along with newly emerging technologies such as host-based diagnostics and next-generation sequencing. Written by recognized leaders and experts in the field, it provides a comprehensive and cutting-edge review of current and emerging technologies in the field of clinical microbiology, including discussions of current techniques such as MALDI-TOF mass spectrometry and molecular diagnostics. It includes a broad range and breadth of techniques covered. Presents discussions on newly emerging technologies such as host-based diagnostics and next-generation

sequencing      **New Vaccine Technologies** Ronald W. Ellis, 2001-06-01 This book systematically addresses all the major available direct and enabling technologies which have contributed to the revolutionized research and development thus improvements to existing vaccines Its target audience is both research and development workers in the field as well as health care personnel who use vaccines It should serve as an      *Vaccinia: New Insights for the Healthcare Professional: 2011 Edition* , 2012-01-09 Vaccinia New Insights for the Healthcare Professional 2011 Edition is a ScholarlyBrief that delivers timely authoritative comprehensive and specialized information about Vaccinia in a concise format The editors have built Vaccinia New Insights for the Healthcare Professional 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Vaccinia in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Vaccinia New Insights for the Healthcare Professional 2011 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>      Pandemic Influenza Vaccine Approaches: Current Status and Future Directions Rebecca Jane Cox, Michael Schotsaert, Corey Patrick Mallett, 2022-09-28      Current Therapy in Avian Medicine and Surgery Volume II E-Book Brian Speer, Yvonne R.A. van Zeeland, 2025-03-04 Stay up to date with the latest advances in avian medicine Current Therapy in Avian Medicine and Surgery Volume II brings a wealth of new information on the medical care of avian species with practical approaches to diagnosis and therapy of psittacines and other birds With many of the topics not previously covered in the first volume the two books are complementary to one another and provide any veterinarian with an interest in avian medicine whether novice or expert the latest advances in internal medicine anesthesia analgesia and surgery Sections dedicated to behavior and welfare neonatology and pediatrics conservation and practice management explore important but less commonly discussed aspects of avian practice With contributions from globally recognized experts on avian medicine this is a must have resource for anyone seeking to enhance and expand their expertise and skills in avian healthcare welfare and conservation With the exception of updates on relevant current topics the information presented in this volume predominantly includes material not previously covered in the first volume The many photographs illustrations and comprehensive tables included in this volume visually highlight key concepts of current avian practice standards Sections on pediatrics falconry toucans and hornbills feature specific topics which are less comprehensively included in most references Focused sections on the respiratory system the beak and skull feathers and feet offer detailed information on these particular anatomical regions Pharmacologic intervention and options are explored in depth to allow for clinicians to gain an optimal understanding of how to best develop treatment plans for their patients NEW An eBook version is included with print purchase The eBook allows you to access all of the text figures and references with

the ability to search customize your content make notes and highlights and have content read aloud Current Therapy format provides up to date information about patient management of specific disorders including innovations in therapy and the pros and cons of proposed treatments Coverage of a wide variety of bird species includes psittacines pigeons raptors ratites waterfowl gallinaceous birds and less common species More than 800 full color images depict avian disease conditions show management strategies and thought processes and aid in formulating guidelines to care Summary tables simplify the lookup of key facts and treatment guidelines Appendices provide quick access to a current drug formulary normal biological data clinical pathologic reference ranges and growth and feeding charts of neonatal birds
