Congenital malformations are worldwide occurrences striking in every condition of society. These severe physical abnormalities which are present at birth and affecting every part of the body happen more often than usually realized once in every 33 births. The most common after heart defects are those of the neural tube, the brain and spinal cord which happen in as many as one in every 350 births. They have been noted as curiosities in man and beast throughout recorded history and received great attention in our time by various fields of study for example their faulty prenatal development by embryologists, familial patterns by geneticists, causation by environmentalists and variability by population scientists. Attention turned much in recent years to the relation of these malformations to deficiency of a particular dietary ingredient, folic acid, a subject this book analyzes in depth. The greatest conundrum of all which this latest matter like so much else hinges on is the amazing fact of the tremendous almost universal decrease in the frequency of these anomalies since early in the 20th century. The puzzle is: What can this downward trend possibly mean and at bottom? Whether it is part of a long term cyclical pattern. This fascinating biological phenomenon is explored in the book together with various other topics.

The changing role of the state in society and the economy, new orientations in public sector management and reform and the growing importance of voluntary organizations and entrepreneurs have given new meaning to the concept of development management. This book argues that the task of managing development in the 1990s is one of encouraging dynamic interactions among public, private and voluntary institutions as well as among external agencies and donors in an effort to raise living standards and to improve economic performance. Emphasizing that development is no longer solely a public sector responsibility, the contributors offer a wholly new paradigm in place of the traditional concerns of public and development administration. They analyze the context in which the private and voluntary sectors and people

oriented initiatives have assumed their current prominence and put forward practical recommendations for sustaining linkages among public administration business administration and management practices in support of the development process in Africa BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
