Shrinking Man:

These Days of Large Things Michael Tavel Clarke, 2007-08-31 The United States at the turn of the twentieth century cultivated a passion for big It witnessed the emergence of large scale corporate capitalism the beginnings of American imperialism on a global stage record level immigration a rapid expansion of cities and colossal events and structures like world s fairs amusement parks department stores and skyscrapers Size began to play a key role in American identity During this period bigness signaled American progress These Days of Large Things explores the centrality of size to American culture and national identity and the preoccupation with physical stature that pervaded American thought Clarke examines the role that body size played in racial theory and the ways in which economic changes in the nation generated conflicting attitudes toward growth and bigness Finally Clarke investigates the relationship between stature and gender These Days of Large Things brings together a remarkable range of cultural material including scientific studies photographs novels cartoons architecture and film As a general cultural and intellectual history of the period this work will be of interest to students and scholars in American studies U S history American literature and gender studies Michael Tavel Clarke is Assistant Professor of English at the University of Calgary Cover photograph New York from Its Pinnacles Alvin Langdon Coburn 1912 Courtesy of the George Eastman House A fascinating study of the American preoccupation with physical size this book charts new paths in the history of science culture and the body A must read for anyone puzzling over why Americans today love hulking SUVs McMansions and outsized masculine bodies Lois Banner University of Southern California From the Gilded Age through the Twenties Clarke shows a nation state obsessed with sheer size ranging from the mammoth labor union to the Giant Incorporated Body of the monopoly trust These Days of Large Things links the towering Gibson Girl with the skyscraper the pediatric regimen with stereotypes of the Jew Spanning anthropology medicine architecture business and labor history Clarke provides the full anatomy of imperial America and offers a model of cultural studies at its very best Cecelia Tichi Vanderbilt University

Invasions USA Michael Bliss, 2014-07-30 Out of more than 180 science fiction films produced in the United States between 1950 and 1959 twenty were concerned with the notion of an invasion Of these a select number used the invasions as metaphors of issues that were of importance to America at the time such as assaults upon individuality and marriage and debates about the supremacy of the human race The invasion may be real The Day the Earth Stood Still and War of the Worlds dreamed Invaders from Mars or the result of a mental breakdown as seems to be the case in Invasion of the Body Snatchers Real or not all of these massive disturbances to the status quo convey the same anxiety In the 1950s many Americans felt that things in their world weren t quite right and this sense of unease was expressed in the country s art notably these films In Invasions USA The Essential Science Fiction Films of the 1950s Michael Bliss examines movies that stripped away the veneer of normality during a decade often portrayed as the last innocent period in American history From a boy s nightmares about his alien controlled parents and a young woman s fears

that her fiancé has been replaced by an emotionless alien to an extraterrestrial visitor who comes to warn mankind about its self-destructive ways the stories of these films offer a variety of messages both subtle and overt With detailed discussions and analyses of the films in question this book examines a unique group of movies with profound messages By exploring depictions of insecurities whether personal or political Bliss shows how science fiction films spoke to American audiences deeply troubled by their circumstances Invasions USA will appeal to science fiction buffs and film aficionados interested in this significant phenomenon in movie and cultural history

Technology and Postmodern Subjectivity in Don DeLillo's Novels Randy Laist, 2010 More than any other major American author Don DeLillo has examined the manner in which contemporary American consciousness has been shaped by the historically unique incursion into daily life of information military and consumer technologies In DeLillo's fictions technological apparatuses are not merely set pieces in the characters' environments nor merely tools to move the plot along they are sites of mystery and magic whirlpools of space time and convex mirrors of identity Television sets filmic images automobiles airplanes telephones computers and nuclear bombs are not simply objects in the world for DeLillo's characters they are psychological phenomena that shape the possibilities for action influence the nature of perception and incorporate themselves into the fabric of memory and identity DeLillo is a phenomenologist of the contemporary technoscape and an ecologist of our new kind of natural habitat Through a close reading of four DeLillo novels *Technology and Postmodern Subjectivity in Don DeLillo's Novels* examines the variety of modes in which DeLillo's fictions illustrate the technologically mediated confluence of his human subjects and the field of cultural objects in which they discover themselves The model of interactionism between human beings and technological instruments that is implicit in DeLillo's writing suggests significant applications both to the study of other contemporary novelists as well as to contemporary cultural studies

Richard Matheson on Screen Matthew R. Bradley, 2010-10-04 Though innumerable biographies have been written about novelists playwrights and poets screenwriters are rarely granted this distinction even ones as prolific and successful as Richard Matheson Beginning with *The Incredible Shrinking Man* in 1957 Matheson has occupied a unique position in writing for television and cinema for more than fifty years This biography documents his rise to prominence his literary influences and the role he played in the horror and science fiction renaissance The narrative examines each of Matheson's works in chronological order with an index indicating where each can be found from his early work in the 1950s through *I Am Legend* in 2007

Hostile Aliens, Hollywood and Today's News Melvin E. Matthews, 2007 1950s Cold War era monsters meet 21st century terrorists Matthews provides a thoughtful interpretation of sci-fi movies that examines the similarities and differences between the political environment and popular culture of two eras This well-researched examination and appreciation of science fiction films includes behind-the-scenes tales about their production and many quotes from those who produced and starred in the films The book will tantalize not only fans of the science fiction genre but also sociologists film historians and politicians The author draws parallels between the Cold War

fears of the 1950s and 60s and the constant terrorism alerts of the September 11th era exploring how the politics and the psychological climate of the times influences and is reflected in this vehicle of popular culture This book is the first of its kind studying the pop culture genre in the wake of the September 11th tragedy The alien invaders of the 1950s signified a Russian invasion of America while other films of the genre such as *Invaders from Mars* depicted aliens utilizing mind control to manipulate humans to commit acts of sabotage signifying Communist enslavement If such a film were made now such invaders could be seen as terrorist masterminds using human slaves to commit terrorist acts Then the 1954 atomic mutation classic is the spiritual ancestor of the 2002 film *Eight Legged Freaks* Finally several 1950s films depicted the end of the world at a time when Americans expected a nuclear war with Russia *Godzilla* the only 1950s era monster to remain a movie star beyond that era can be fashioned to reflect whatever issues dominate the times nuclear war in the 1950s environmental pollution in the 1970s Conceivably a *Godzilla* for the age of terrorism is soon to be released The immediate pre September 11th era witnessed films presenting galactic threats to mankind's existence *Independence Day* *Armageddon* *Deep Impact* while the early 2000s witnessed the popularity of the *Left Behind* Christian films dramatizing the Tribulation period in the Book of Revelation It seems that whatever the era and whatever the challenges and crises confronting America many entertainment themes remain the same reflecting their respective times and the relevant issues

Melvin E Matthews Jr is a freelance writer and a horror movie aficionado who has been studying the genre for thirty years In this work he shares his personal correspondence with film and television star Beverly Garland and brings together a wealth of detail about the fun and the challenges of the costumes stunts and special effects as well as the actors and producers thoughts on the meaning behind the stories

The Shrinking Man Richard Matheson, 2014-12-22 While on a boating holiday Scott Carey is exposed to a cloud of radioactive spray A few weeks later following a series of medical examinations he can no longer deny the extraordinary truth Not only is he losing weight he is also shorter than he was Scott Carey has begun to shrink Richard Matheson's novel follows through its premise with remorseless logic with Carey first attempting to continue some kind of normal life and later having left human contact behind having to survive in a world where insects and spiders are giant adversaries And even that is only a stage on his journey into the unknown
