X-ray Detection By Superconducting Tunnel Junctions - Proceedings Of The International Workshop R

Cristiano, Sergio Pagano, Antonio Barone, 1991-10-16 This volume gives the state of the art on superconducting tunnel junctions as X ray detectors for low energy radioastronomy Contributions from major experts of the main laboratories in the world are included They cover many aspects of the subject from nonequilibrium phenomena in STJ to the detector design optimization and report the most recent experimental results in the field Epitaxial Growth J. W. Matthews, 2013-10-22

Epitaxial Growth Part B is the second part of a collection of review articles that describe various aspects of the growth of single crystal films on single crystal substrates The topics discussed are the nucleation of thin films the structure of the interface between film and substrate and the generation of defects during film growth The methods used to prepare and examine thin films are described and a list of the overgrowth substrate combinations studied so far is given Proceedings

Semiconductors, The - Proceedings Of The 22nd International Conference (In 3 Volumes) David J Lockwood, 1995-01-20

These proceedings review the progress in most aspects of semiconductor physics including those related to materials processing and devices The conference continues the tradition of the ICPS series and these volumes include state of the art lectures The plenary and invited papers address areas of major interest These volumes will serve as excellent material for researchers in semiconductor physics and related fields **Proceedings of the Fifth International Symposium on**
