A Brief History of Modern Warfare Richard Connaughton,2013-02-07 Since Vietnam both the way we fight and our reasons for going to war have become much more complex The importance of a conflict is determined not by its size or by the numbers of combatants involved but by its ripple effects and its influence upon future events In a series of thrilling recreations of eight of the most significant encounters of the last three decades military historian Richard Connaughton presents a fascinating insight into modern warfare including interviews with some of the major figures The conflicts include Goose Green in the Falklands the invasion of Grenada Operation Desert Storm the first Iraq War Operations in Mogadishu as immortalized in the book and film Blackhawk Down the Siege of Gorazde and Operation Barras in Sierra Leone as well as more recent events at Fallujah Iraq and in Helmand Province Afghanistan Richard Connaughton has interviewed most of the major figures involved in each of the conflicts and offers powerful insights into why battles either work or don t This book will tell you what warfare means in the contemporary world and how it can affect tomorrow **Peacekeeping in Africa** Oliver Furley,Roy May,2021-05-11 First published in 1998 Peacekeeping in Africa was written to help make up the shortfall in the number of books that concentrated specifically on peacekeeping in Africa The book covers the main peacekeeping operations

of Africa and provides a wealth of background material In doing so it explores the policies and actions of the international organisations concerned and the participating African states It also considers the impact of sub regional powers and the role of the USA Britain and France Comprising three parts Peacekeeping in Africa examines world perspectives case studies and wider issues surrounding Africa s peacekeeping operations Routledge Library Editions: Postcolonial Security Studies Various,2021-08-31 Published between 1985 and 1998 the five volumes in this set explore a wide range of themes and topics relating to postcolonial security studies Offering both broader overviews of political and military regimes across the world and more focused examinations of specific areas and conflicts such as Africa Cuba and the Falklands War they provide a wealth of information that will appeal to those with an interest in military and strategic studies political and military history political and military theory and international relations *Invading Australia* Peter Stanley,2008-06-03 1942 was a key year in Australia s history As its people had so long feared White Australia an outpost of empire seemed about to be invaded by the Japanese In that one year Darwin was bombed submarines torpedoed ships in Sydney Harbour and Australian Militiamen died on the Kokoda Trail Each year more and more Australians celebrate Anzac Day and honour the lives of those who fought for their country There is even a push to create a new public holiday in remembrance and celebration of the Battle for Australia But was there ever really such a battle and how close did Australia actually come to being invaded *Invading Australia* provides a comprehensive thorough and well argued examination of these and other pertinent questions Peter Stanley writes compellingly about Australian attitudes to Japan before during and after World War II and uses archival sources to discuss Japan s war plans early in 1942 He also shows that rather than a Battle for Australia there was a worldwide fight for freedom and democracy that has allowed the West to enjoy great prosperity in the decades since 1945

The to Z of World War II Anne Sharp Wells,2009-09-28 Because of the enormity of World War II and the numerous
geographic areas and belligerents involved this study has been divided into two volumes The first examines the war between
Japan and the Allied powers It covers the conflict in Asia beginning with the Japanese seizure of Manchuria in September
1931 to Japanese s surrender in September 1945 and the immediate post war years in Asia and the Pacific The second
volume addresses the war against Germany and Italy **The Nature of Future Conflict** Richard Michael
Connaughton,1995 Whilst the collapse of the Soviet Union and with it the associated Warsaw Pact has greatly reduced the
threat of a major conflict with Europe the story of the involvement of the United Nations in so called peace operations over
the past six years makes it abundantly clear that the world wide incidence of low intensity intra state conflict will remain for
us as far ahead as we can see and that the resources and procedures which are essential for the success of future UN
operations are yet to be produced Richard Connaughton has already published a philosophical treatise entitled Military

Intervention in the 1990s A New Logic of War in which he validated the nine principles emerging from a study of the conduct of military interventions between 1918 and 1990 against lessons emerging from the Gulf War of 1990 91 A subsequent quadripartite conference held at the British Army Staff collage found that those principles applied equally to an intra state conflict such as the former Yugoslavia In this forthright and highly professional study drawing upon those principles Richard Connaughton seeks to examine the nature of future conflict and knowledge for the benefit of those called upon to make real time decisions He pulls no punches leaving the reader with a very clear understanding of the defects of our present international machinery of the maintenance of peace He emphasises the pressing need for a new free range study of the UN in it s 50th year to establish not only the comprehensive reforms to it s organisation and procedures that are so badly needed but also a clear statement of what is required of the organisation s membership as the providers of those resources without which success is unobtainable
