**The Bamboos** Geoffrey Peter Chapman, Linnean Society of London, Royal Botanic Gardens, Kew, Wye College, 1997 The sheer usefulness of bamboos is well known From acupuncture needles to whisks for teamaking they have been utilised in a thousand ways However their primary interest for botanists lies elsewhere for the diversity of these remarkable plants has a profound significance for our understanding of the grass family in general The deceptive simplicity of grasses actually represents a kind of botanical shorthand Behind this degree of economy in modern grasses there is to extend the analogy a longhand represented by the bamboos The origins of the grass family the Poaceae or Gramineae lie remote in time and due to a frustrating dearth of fossils are largely inaccessible to us hence the interest of bamboos They are a large and diverse group spanning both the Old and New Worlds Most are woody yet some are herbaceous They combine both primitive and advanced features This book provides a wide coverage of many of the most intriguing aspects of both New and Old World bamboos Following an introductory chapter outlining various current research concerns there is a contribution based on *Chusquea* which examines the place of bamboo in stable forest situations and provides a basis for the ecological and taxonomic chapters which follow Attention then turns to modern views on bamboo flowering and its control under in vitro conditions Flowering behaviour is then linked to the relationship for the diet and

survival of the Giant Panda Utilising molecular biology attention is next given to the genetics and evolution of the bamboos
