Simple Science Experiments:

47 Easy-to-Do Classic Science Experiments Eugene F. Provenzo, Asterie Baker Provenzo, 2012-07-31 Here is a highly motivating book for grade school students that will introduce them to many of the world's most popular and historically significant scientific experiments. They'll learn about gravity simply by following the acrobatic antics of an ordinary coin. By trying to blow an egg out of a cup, they'll discover the principles of air pressure. Dancing soap bubbles will help them understand the effects of static electricity and by dropping quarters into a full glass of water without causing it to overflow, they'll study the effects of surface tension. These and over 40 other experiments have been carefully selected by noted educators Eugene and Asterie Baker Provenzo to familiarize children with classic science experiments involving optics, inertia, air pressure, magnetism, sound, topology, light, density, vibration, prisms, elasticity, gases, vacuum, perspective, geometry, centrifugal force, buoyancy, color, and much more. Some experiments such as the optical Newton's Rings are hundreds of years old. Still others like the straw lever test are based on Greek experiments with leverage and the center of gravity first carried out thousands of years ago. Easy to follow instructions and illustrations show youngsters how to perform each experiment, most of which are prefaced with historical background, a list of necessary materials, and an explanation of key terms. Almost all experiments can be carried out with common household items: tissue paper, scissors, tapes, rubber balloons, pens, pencils, etc. and can be worked at home or in the classroom to demonstrate specific scientific principles or to supplement a science curriculum unit. Sources for all historical illustrations given in the text are listed at the end of the book. *The 101 Coolest Simple Science Experiments* Holly Homer, Rachel Miller, Jamie Harrington, 2016-04-19 Perform Mind-Blowing Science Experiments at Home. You'll have the time of your life conducting these incredible wacky and fun experiments with your parents, teachers, babysitters, and other adults. You'll investigate, answer your questions, and expand your knowledge using everyday household items. The Quirky Mommas from the wildly popular Kids Activities Blog and authors of the bestselling 101 Kids Activities That Are the Bestest Funnest Ever have done it again with this book of ridiculously amazing simple science experiments. You can do things both indoors and outdoors. The handy mess meter, preparation times, and notes on the level of supervision will keep your parents happy and you safe. Experimenting is really fun, and you will have a blast being a scientist. You will be so entertained you might not notice you're also learning important things about the world around you. Some experiments to master: Balloon Powered Car, Burst Soap, Clou, CD Hovercraft, Creeping Ink, Bendy Bones, Electromagnet, Paper Helicopters, Unbreakable Bubbles. Now put on your lab coat and let's get experimenting.
